

BARACK OBAMA MANIPULATED THE SERVERS AT  
WHITEHOUSE.GOV TO RIG THE RESULTS OF HUNDREDS OF  
FEDERAL PETITIONS.

THE SERVER STATS AND THE EX-IT STAFF PROVE IT.

OBAMA WANTED TO STOP ANY ATTEMPT TO EXPOSE THESE  
DANGEROUS TOXIC LITHIUM ION BATTERIES BECAUSE HE, HIS  
STAFF AND HIS FRIENDS OWNED THE STOCK MARKET FUNDS FOR  
LITHIUM ION!!!

WE THE PEOPLE ASK THE FEDERAL GOVERNMENT TO PROPOSE A NEW ADMINISTRATION POLICY

## Ban dangerous lithium ion batteries from U.S. regions as advised by thousands of experts

Created by S.R. on November 07, 2016

Sub-atomic issues and the highly explosive nature of lithium ion batteries cause them to explode all the time. Lithium ion batteries explode when they get wet, bumped, charged or cross certain types of high-energy fields. The lithium is mined in Afghanistan, Bolivia and other war-profiteering regions which are exploited by those very same campaign billionaires.

Federal investigators and federal MSDS records state that the thermal vapors from these batteries cause cancer, brain and liver damage, neurological damage and mutate the fetus in the womb. The FAA and the UN have published extensive new rules warning about the lethal dangers of lithium ion batteries. A large percentage of the factory workers, that make lithium ion batteries, become poisoned and often die from the poisoning.

Lamya Bouyirdane noticed her lithium ion powered phone was very hot after she asked her four-year-old son to pass it over. She said she threw the phone away when she realized it had “swollen up” and smoke was coming out. The phone then caught fire and the back of the handset blew off. Her partner quickly extinguished it.

Bouyirdane, who resides in the southwestern French city of Pau, said she will sue Samsung.

Samsung recently recalled millions of its Galaxy Note 7 smartphones because of a problem that caused the batteries to overheat and catch fire. In fact, all devices with lithium ion batteries are a severe danger to the public.

products explode because they use dangerous lithium ion batteries which are owned and controlled by the Obama Administrations campaign financiers. The FAA and the United Nations have published extensive new rules warning about the lethal dangers of lithium ion batteries. The “lost” flight MH370 had a cargo hold full of lithium ion batteries which are suspected of crashing the plane. Erick Strickland, the head of the Obama auto safety agency quit the agency after being confronted with safety issue cover-up charges. Google and Tesla “driver-less cars” seek to exploit their lithium ion holdings via DOT and DOE grants and subsidies financed by taxpayers.

A large percentage of the factory workers, that make lithium ion batteries, become poisoned and often die from the poisoning. Towns and villages near battery factories become permanently toxic. Lithium ion batteries can not be fully recycled and poison the landfills where they are dumped. The Obama Administration has ordered the DOT to not demand the recall of Tesla cars in order to protect Obama campaign financiers at Google, Kleiner Perkins, Draper-Fisher, Tesla and other political fronts. Lithium ion battery safety dangers may be one of the most covered-up consumer safety issues in history.
