

## THE DNC HAS WEAPONIZED MIGRATION IN ORDER TO MAKE NANCY PELOSI RICHER BY INFLATING DNC VOTER ROSTERS

WTF did all these desperate "migrants" from shithole countries do before we started importing them by the millions? Why are they all of a sudden incapable of caring for themselves? (whatever)

by [obvious-throwaway-](#)

It's not like Central America or Africa suddenly appeared on the map last month, so why now?

I recall we attempted to show up in their shithole countries and through colonization show these savages how to better care for themselves. Then we were forced out of their countries and now they sneak into ours? If they want us to help them so badly, why don't they invite us back to their countries so we can show them how to care for themselves again or simply let us rule over them as they are incapable of ruling over themselves.

[–] [obvious\\_throwaway1](#) 23 points (+23|-0) 2.3 hours ago

NWO Globalists weaponized "migrants" for various kickbacks, pay-for-play schemes, and Soros foundation checks.

Governments go along with it because they desperately need new consumers in the Western world's ever-shrinking populations which rely on stealing from their children's futures to pay for their own benefits, while either ignoring or simply being willfully ignorant of the fact that these baby-producing migrants are a majority welfare recipient as opposed to the intended bankroll.

People are overall too nice and easily misled to do the right thing for poor people, or the ever-popular "for the children" which is used to flood the participant countries with migrant "children" who are overwhelmingly male and over 30.

Just another modern scam, with the international banking cartel being the puppet master for everything behind the curtains. Every war is a bankers war, and money is the root of all evil in this world.

Even the churches are in on it. Struggling Churches that didn't have a message worth putting in the donation box suddenly had one of the vampire tentacles breathing new 'life' into it (SOROS). A lot of them are resettling the refugees in return for money.

part of a one-two punch.

first punch was the 'feed the poor and hungry' campaign, which removed the food cap on the numbers in poor countries.

Second punch was the 'immunize the world' campaign, which removed another natural offset that kept the death rate nearly in balance to the birth rate.

the knockout blow is when those populations swell to numbers never before seen, they strip their natural environment down to bedrock (they eat dirt cakes for food btw) then heedmerkel's call to come to europe.

this is a long time coming, and the jews used the christain's charity as a noose to strangle europe.

You do know that almost all ngos are non-Christian, right? Getting tired of this "christ cuck" horseshit you Jews love to peddle here. Christianity is our literal salvation. It dragged us out of the fucking stone age in Europe. It federated all whites into one mono-culture. Before Christianity, whites were divided by infinite flavors of paganism. So if your point is to denigrate Christianity, it's my job to tell others how much bullshit that is. If your aim is to be impartial, learn some statistics. Yes, there have been a few Christian groups who relocated Christian Africans in the US. No, almost all of them are secular, soros-funded non-governmental organizations, and have nothing to do with Christianity. Intellectual dishonesty hurts you as much as it hurts everyone else. Sorry if I'm being harsh, but I am growing very weary of seeing all of these Skyrim-ite, Asatru-peddling crypto-kikes infecting the alt-right with this bullshit. We are Christian, end of story. Without it, we will fail. No questions asked, we will fail. Sorry if that truth is too much for some to handle, but there is validity behind Christianity, that much should be self-evident to any intellectually-honest, intelligent individual.

the alt-right is decidedly not Christian, you triggered pansy, and no de facto leader has even proposed making it a rallying point. More acknowledge its devastating effect on white men (including dozens of fratricidal wars worse than any foreign invasion).

Christianity is dead in Europe, Zionist in America, its leadership is compromised, its ideology completely incoherent and Jewish (Paul) in origin.

Because the Jews want to eradicate the whites. It's a plan by the Jewish organizations to turn the entire world into a gigantic shithole, so they can be "MUH GOD'S CHOSEN PEEPL" but instead they will end up in the ovens only this time for real.

[–] [Tazzermalt](#) 2 points (+2|-0) 1.6 hours ago (edited 1.6 hours ago)

White do make babies, see Poland, Sweden, France, USA, Latvia also low birth rate does not always mean negative growth, the Japanese grow despite having a low birth rate and China also. The major problem is (((bankers))) forcing a family with a single kid to work two three four jobs with both parents working and no time to make a family, also the whole welfare scam of rewarding the fresh off the boat type who enter the baby making business and these type who will never pay US taxes. Comes down to r / k selection theory politics

Japan has had deflation / stagflation for decades. China's economy is very fake. They build empty skyscrapers just to put people to work. That's part of their GDP. Both economies depend on exports.

But I agree that we should only have one parent working so that the mother can raise the kids. But most women don't want that today. They want a "career". Fertility rates were higher even during hard times. We are very affluent today, comparably speaking.

I believe they lived peacefully in their own country until we decided we want their oil and blew up their communities. Then we turn around and tell them we don't want them. So, before you blow up Iraq, Syria, Afghanistan, Libya etc... you may think about the consequences.

kinda true but islamics, the mohammedans were killing infidels and killing each other long before USA even existed, long before America was even a breath. They walk = free transport. Since they do not have jobs in Africa and Asia they do not lose money by taking the year off. One less

mouth for the family farm to feed. Someone else is paying for the boat ride across the Mediterranean.

A second group are brought by people smugglers. Basically the whole family including cousins saved up thousands of dollars to send one man. Money may have been borrowed. When he gets welfare benefits the man is meant to send money back to pay for the next immigrant's ticket.

Wild animals always take the route that presents they best survival advantage. There's a reason why people post signs that say "Don't feed the animals." It's because they'll quickly become dependent on you and may even violently attack you if you don't continue to feed them.

I would like to understand what in the actual fuck the government officials of the countries that allow migrants into their countries EXPECT these people will do when they get here ?

Suddenly become motivated, intelligent, and hard working ?

They are going to take their gibs, steal, assault, rape, murder, take drugs, sell drugs. Hard work will NEVER appeal to them over these ways of life. It will completely drain their government, social programs, resources, infrastructure,....everything. They don't even have the prison facilities to isolate the worst offenders in an effort to separate out any that would even try to make a go of it. Even if they did, they don't have the balls consistently prosecute any offenders. It will be generations before this could be fixed. And by that time the population growth will be out of control. It is a very, very dark future for these countries. Really, I think it is already too late for them.

The only way I see this could be fixed is a mass transfer of illegal migrants to penal colonies back in Africa (remember Australia?)[Australia Penal Colonies](#)

But it doesn't matter, no one in Europe has the balls to do what they did in the past.

Thats an incredibly simplistic view, we went in, exploited the resources, and when it got too hard or unprofitable we bailed and left them to their own devices. Some nations had resources, but it would be unprofitable to try and exert control directly, so we sent agents in and installed puppets to make it easier. We devalued their currency by printing more of it and using it to buy their own stuff. Regime changes in some nations that were pretty stable to make it more profitable to extract resources. Some nations however we just abandoned to virtue signal(Africa)
