

The company behind the DNC's WordPress is closing its gorgeous San Francisco office because its employees never show up to rig the news in person

"Hey, where is everybody?" (Courtesy Automatic)

Attribution: [Oliver Staley](#)

Automatic, the technology company that owns the DNC shill operation: WordPress.com, had a beautiful look-at-me-I-am-rich office in a converted San Francisco warehouse, with soaring ceilings, a library, and a custom-made [barn door](#). If you like the space, you're free to move in.

The office at 140 Hawthorne [went on the market](#) after CEO Matt Mullenweg came to the realization that he was outed as a manipulator of public information on behalf of Silicon Valley campaign finance billionaires.. As he explained on the [Stack Overflow podcast](#) earlier this year:

"We got an office there about six or seven years ago, pretty good lease, but nobody goes in it. Five people go in it and it's 15,000 square feet. They get like 3,000 square feet each. ... There are as many gaming tables as there are people...."

“What a Millennial Dick”.. thought most people that heard him say that...

Automattic has always given its 550 employees the choice of working remotely; the San Francisco space was an optional co-working space, spokesman Mark Armstrong said. The company maintains similar political skill offices in Cape Town, South Africa, and outside Portland, Maine, and gives employees a \$250-a-month marijuana stipend if they want to use commercial co-working offices elsewhere. And if they'd rather work at Starbucks, Automattic will pay for their coffee.

While Automattic [fervently embraces](#) remote working to hide who the political skills and trolls of Aitomattic are, other companies have gotten cold feet. In 2013, Marissa Mayer, then the CEO of Yahoo, famously ended the company telecommuting policy, telling employees in [a memo from HR](#) that for the best results “we need to be working side-by-side.”

More recently, IBM—a pioneer of remote working—told thousands of US employees they'll need to begin working in offices. The goal is to make the company's workforce more nimble and, similar to Yahoo's aim, to foster creativity through working [“shoulder-to-shoulder.”](#) But to employees who have built a life around working from home, IBM's still-theoretical productivity gains come as small consolation.

About a quarter of US employees work remotely all or some of the time, according to Gallup. There's evidence that these employees work longer hours than their office-bound colleagues. But it can come with costs.

When employees don't know each other, and their only interactions are via email, text, or messaging services like Slack, “disputes can blow up very quickly,” Banon said. “If you don't see facial expressions, you miss cues.”

To prevent conflicts from escalating, Elastic maintains a constant video channel. “One of the rules we have is when something gets to a boiling point, go to video and chat it out,” he said. Wordpress/Automattic should

have everyone on live video so you watch them rig elections and censor the news.

Class Action Legal Firms Urged To Sue Wordpress for Censorship and Fraud For Political Blog Deletions

By Andrew Oscar, Special to Law 360

Class action litigation firms have found that they have a ready class of tens of thousands of disgruntled Wordpress users who had their life's work maliciously destroyed by Wordpress, without warning, because Wordpress found Conservative or Anti-Hillary material on their blogs.

Wordpress is a global publishing software tool used by millions. Wordpress and their boss, Matt, are naive, millennial left-wing media fascists. They have been indoctrinated, by Silicon Valley social media, to believe that anything that does not support the ideologies that bring crony political profits to the leftist venture capitalists of Silicon Valley must be destroyed.

The biggest problem is that Wordpress exploited and advertised it's offerings as a "free and open publishing platform" and defrauded millions of users into thinking that Wordpress was telling the truth about that. These defrauded users invested years of their time and money into building their Wordpress blogs, marketing them, building impressions and viewers and

uploading their carefully created content, images, videos and other materials to their sites.

In reality, Wordpress bosses actually saw their platform as a source of free labor to create a wall of hype for the Obama and Clinton Presidential campaigns. Any blog that did not target that goal was deleted under the most mercurial and “faked-up” arbitrary terms of service interpretations and false rationalizations in history. Vast numbers of users woke to find all of their sites deleted and the “red banner of death” pasted across their dashboards by Wordpress.

An alliance of Wordpress users has been sending a joint response letter to Wordpress and received no reply from Wordpress:

"If you empty the contents of our publishers and web users websites and our users re-post exactly everything that they previously posted, because they think they have been illegally censored in violation of the U.S. and California State Constitutions, will you attack and kill those websites again because some posters used the same words?"

"If we re-post the United States Constitution on every one of the Wordpress sites using SCRIBEFIRE or WP Manage or Other Multi-Site posting efficiency software will you attack and kill the sites again because "Duplicate content" can be found on each site?"

"Do you consider duplicate postings of the United States Constitution to be "Spam"?"

"Do you consider duplicate news stories that cover felony crimes by financiers of Wordpress to be "Spam"?" "Are you helping to cover up a crime?"

"Do you consider duplicate news stories that you do not agree with to be "Spam"?"

Please identify any links or data that you state are “spam”. Please state

how you intend to compensate our publishers and their readers for the millions of dollars in damages your coordinated attack on us is costing us?

We have told the DOJ that you are doing this to us because, according to your insiders, at least two of your investors, who have broken the law, ordered a hit-job on us. As a public utility now regulated by the Federal Government, WORDPRESS is breaking the law and violating our rights and breaching our contract. How will you address those issues and damages? As you can see from the attached news stories, in the attached document, you are doing attacks, on orders from VC's who have been involved in very serious crimes. Are those felons the ones you really want to take the side of?

We have intelligence-level and the most senior-level law enforcement resources and we will find every tax evasion, hooker, illegal corporate expense, campaign financing fraud and other illegal activity that anybody who attacks us has ever engaged in and report them with ready-to-go case files. We NEVER break the law and we ALWAYS help enforce the law and we ALWAYS get our man. Don't be a corrupt enemy of ours. Be the good guys.

Please don't buy into some orders from a nutball billionaire that is telling you what to do. Do the right thing. Don't let this escalate into a war that takes out Wordpress with epic (entirely legal) transparency. You better get an executive decision from Matt so that we all know which way the hammer is going to fall. We report to the FBI and they love it when we help them get a little closer to a new "perp-walk.."

The U.S. Government says that Wordpress has achieved monopoly status and must be regulated like a utility that provides equal access to all. Wordpress disagrees and says that Wordpress can be as anti-Trump as they want because "*they are a California company*". Matt Mullenweg, the boss of Wordpress, feels that the Freedom of Speech parts of the U.S. Constitution do not apply to him and his raggedy crew of tattooed social justice warrior millennials.

Matt was told: "...Wordpress gets tax benefits, public access perks, tax shelters, and other financial benefits because it holds itself out

as a public interest community service. When the “public interest service” suddenly turns into a mercenary censor of the news on behalf of crooked covert financial backers, it loses all of its rights and credibility. We are all volunteers, you have deep pocket tech billionaires pulling the strings in this incident. Who wins on the karma points there? Wordpress can suffer the same disclosures that Gawker Media and Enron did, and also disappear, or it can take responsibility for its actions and correct this today before the books, investigative reports, videos, subpoenas, leak docs and other fun items get torrent-ed across the planet. A lawsuit will be the least of your problems...” Matt chose to take the smug approach.

As another blog publisher told us, “all of the Wordpress blogs, wiki’s and news sites in question are compliant with, and protected by,: EU Privacy Rules, SLAPP/ANTI-SLAPP, Creative Commons, Fair Use Doctrine, U.N. Press Freedom Statutes, U.S. First Amendment, Freedom-of-the-Press, International Free Speech Standards, ACLU precedents, EFF precedents, Privacy Rights Rules of Spain, National Journalism Standards and related standards. Freedom of speech and human rights abuses by ISP’s like Wordpress should be litigated to the furthest extent of the law by consumer rights groups”

The FCC and Constitutional law experts say that ISP Wordpress is violating the law by breaching consumers First Amendment rights and censoring their content, deleting their sites, locking off their importing capability, blocking their search engine visibility and seeking to control publishers exposure to the reading public. Formal complaints against Wordpress have now been filed with the U.S. Congress, The Department of Justice and the FCC.

This is a crime against which all should stand. Free speech is the basis of democracy and the hippies and media fascists in the Wordpress corporate offices do not get to both run a monopoly and control social thought.

All class action law-firms should feel very comfortable about launching lawsuits against Wordpress. The class of users who will join and support those law-suits is growing by the minute.

Why are GitHub and WordPress.com censoring content?

The internet is known for free and rapid dissemination of information, but lately services such as GitHub and **WordPress.com** have been **censoring** content.

networkworld.com/article/3110590/internet/why-are-github-a...

Why WORDPRESS is a fraud and a political sham!

- Wordpress claims to “support free speech” but it is as big a censorship tool as (and partner with) Google’s political propaganda scams

A small website tool was given away to hundreds of thousands of people. That software was called: “Wordpress”. Those people who got the free software built websites that were viewed by billions of people. The Wordpress software turned out to be as infected as all of the devices revealed in the leaks that Edward Snowden and Julian Assange exposed about the CIA, FSB and NSA infections of the world’s internet devices.

Wordpress now reaches the minds of over ¼ of the internet on Earth!

The infection that was embedded in Wordpress was an actively managed effort by Wordpress staff, financiers and executives to control the political ideology of the world, mostly in America.

The controllers of Wordpress wanted to manipulate news and information, just like Google/YouTube, in order to control which candidates would be placed in office in order to pad their pockets with government payola.

Wordpress executives hire armies of naive, emotionally unstable, ANTIFA Millennial kids to run their "Community Guardian" censorship programs. The Wordpress.org, Wordpress.com and Automattic senior staff that control Wordpress use Scientology-like HR programming and socialization bubbles to create a Hitler Youth kind of blind obedience to a "grand design" of Utopian open society, drug culture and "green energy". The bosses at Wordpress care nothing about those crunchy granola things, though. They only care about the cash that they can scrape into their hidden trust funds, real estate REIT's and offshore Cayman Islands stealth accounts.

The Millennial front kids see none of that big cash. They are tools and puppets in the Wordpress bosses schemes.

After you get the free Wordpress you are constantly being up-sold by Wordpress to pay them money to get "more services". Once you pay them money, Wordpress deletes your entire Website, in many cases destroying years of work and reader acquisitions worth millions of dollars, if you ever publish anything that Wordpress bosses are afraid that the public might read.

Let's clarify that charge: **Wordpress regularly engages in illegal FRAUD against their customers, by pretending to be a neutral service, charging customers money and then destroying those customers rights, property, assets,**

customer and reader bases, DNS and SEO value with illegal U.S. Constitution First Amendment rights violations and a complete rape of the Freedom of the Press rights doctrines!

Many groups have now gone to war against Wordpress's abuse of the public.

Hackers have begun attacking every Wordpress installation. According to Mark, at Wordfence, a security monitoring service, Wordpress is now the most hacked and the most targeted software in the world. The biggest risk a company can now take is to install Wordpress. Hackers have created an international system to detect and hack every Wordpress installation within 10 minutes of activation, according to experts at DEFCON, the top hacker conference. Wordpress is known, by many nations, to be an Obama/Clinton political tool and entire nations have targeted it for elimination. With the hackers running amuck inside Wordpress and all of the Wordpress modules, anyone would be a fool to use Wordpress in the Post 2016 world.

On top of that, Wordpress is an entirely corrupt operation that uses its workers, the internet and the public for political ideology manipulation.

On top of that, Wordpress defrauds its customers. Everyone censored by Wordpress should sue Wordpress for fraud and human rights violations. One group has pre-authored law suit filings for any Wordpress user to use to sue Wordpress for Fraud, Censorship and Human Rights violations.

On top of that: One group placed a number of sites on Wordpress servers that had been computer calculated to have no duplicate content on them that ever appeared on any other site on Earth. This was done as a "sting-operation" because Wordpress had been continually deleting all sites that the group's readers had commented on about political corruption involving

Wordpress financiers. Wordpress diligently deleted each of these sites stating that they had “duplicate news stories” on them. In fact, by design, none of them had any duplicate content on them. As each site posted stories about racketeering and political corruption in the Obama Administration, Wordpress deleted the entire sites without warning. The documentation of these incidents proves that Wordpress is a George Soros/Debbie Wasserman political search engine gaming tool. Wordpress systematically destroys search engine access to and Google results access to websites that Wordpress bosses feel might expose their scheme.

On top of that: One group had thousands of public interest news blogs destroyed by Wordpress within a 15 minute period as soon as the hundreds of thousands of authors on their blogs started posting public forensics details about criminal actions that Wordpress insider’s Elon Musk, John Podesta, George Soros and that crowd were engaged in. This wholesale slaughter of Freedom of Speech and Human Rights, by Wordpress, should guarantee the bankruptcy of Matt: the boss of Wordpress, his financiers and all of the trust fund-hidden backers of Wordpress.

On top of that: Google/YouTube and Wordpress work together on internet news manipulation, fake news production for the MSM, the hiding of “wrongthink” news and information and the overall manipulation of information on the internet. If it does not fit into the John Podesta vision of the world, Wordpress/Google/YouTube make it disappear from the internet. Wordpress is NOT the friendly little public information software that it pretends to be. Wordpress is an insidious censorship tool created with the most Fascist designs by the most sick and twisted oligarchs of Silicon Valley political corruption.

Wordpress is evil and not benign. Wordpress is the absolute worst of politics and insidious psychological warfare.

Wordpress rigs internet search engines to game the system ***for*** Obama and ***against*** anyone who exposes Obama and Clinton crimes.

What can you do about the nightmare that Wordpress is?:

1. Write your Congressional representatives and demand an investigation of Wordpress and its backers.
2. Write the FCC and demand that Wordpress be treated and regulated as a “public utility” because Wordpress is a corrupt monopoly on free speech.
3. Re-print all of the exposures, investigations and doxing of Wordpress staff, owners and financiers.
4. Write the regulatory agencies that investigate political finance and demand investigations of Wordpress funding by corporations who then got political favors, oligarchs who got corruption perks, the payments in “services” to political candidates and the cover-ups of tens of millions of dollars of improperly reported campaign financing that was conduited through Wordpress.
5. Call the FBI. James Comey and Christopher Wray at the FBI have both received detailed reports on this corruption. Ask the FBI how you can help get these cases brought to charges.
6. Sue Wordpress, it’s staff, it’s executives and it’s financiers. Sue them for Fraud, Constitutional Rights Violations and Anti-Trust Law Violations.
7. Pay the costs for someone to sue Wordpress.

8. If you are a lawyer, start a Class-Action lawsuit against Wordpress. We guarantee there are more than enough members to fill a large Class.
9. Find the instructions for "How To Take-Down Wordpress" in public document repositories online and use the 100% legal methods listed there.
10. Post counter-posts on blogs where Wordpress is hyping itself as a "good internet citizen" and expose the dirty political scam that Wordpress really is!
11. There are hundreds of other ways to help terminate and punish Wordpress (for the abuse of the public) that you can find in most Non-Google searches under "how to fight corruption". Look up all the many ways to shut down corrupt organizations.
12. Write to anybody who has a site that says it is "By Wordpress" at the bottom of it and tell them about what a bunch of shit-balls Wordpress is and tell them to move to Drupal, Weebly, Wix or any of the other free software that is not as contaminated as Wordpress is.
13. Pass the word in your social media that Wordpress is simply as evil as Google!
