THE CURRENT PRIMARY CASE - THE CLEANTECH CRASH:

How [White House](#), and [Sacramento State Capital](#), staff [maliciously sabotaged](#) a huge number of [American companies](#), and the nation's future, in order to "[clear the decks](#)" for [illicit stock scam Payola for themselves, and their billionaire campaign financiers](#). You heard about [Solyndra](#) but you haven't heard [the whole story](#). Now you will...

- Every single applicant, who was not a campaign crony, was denied, sabotaged and attacked.
- Only campaign crony's got the cash, and every one of their competitors got jacked!
- The facts are in. The evidence is indisputable. The crimes hurt every single taxpayer!

This was a clear, and overt, "organized crime" felony-class criminal activity, proven in hundreds of thousands of pages of evidence. Public officials engaged in attacks and manipulations, against U.S. taxpaying citizens, in order to line the politicians own pockets with HUNDREDS OF BILLIONS OF DOLLARS OF TAXPAYER CASH WHICH WAS COVERTLY ROUTED, BY PUBLIC OFFICIALS, TO THEIR FRIENDS . As of now, not a single government authority has taken any action, or responsibility for resolving it. This was a political campaign financing kickback and stock market manipulation scheme. American companies were attacked and sabotaged by politicians, and their campaign financiers, using taxpayer resources, because those companies had better products. That is not how America is supposed to work. The bad guys chose to CHEAT RATHER THAN COMPETE. The bad guys committed crimes, ran corruption schemes and they won't allow the victims into court, or in front of a Special Prosecutor, to get justice. The cover-up must end, now, and justice must begin now!

"IN COURT, WE WILL PROVE, BEYOND A SHADOW OF A DOUBT, THAT WHITE HOUSE AND SACRAMENTO STATE CAPITOL OFFICIALS, AS THEY SAT IN THE HIGHEST OFFICES IN THE LAND, ORDERED POLITICAL "HIT JOBS" AND CHARACTER ASSASSINATIONS ON U.S. TAXPAYING CITIZENS IN THE HEART OF AMERICA, OUT OF PURE MALEVOLENCE AND PETTY HIGH-SCHOOL LEVEL VENGEANCE!"

AFGHANI-SCAM

THE EVIDENCE PROVES THE FOLLOWING:

- Somewhere between 800 million, and over six trillion, dollars of U.S. taxpayer money was embezzled in corruption schemes in [Afghanistan, many of those tied to crooked mining deals for Silicon Valley campaign financiers](#)
- Campaign financiers were directly involved in organizing some of these Afghan corruption scams
- Google and Tesla were campaign financiers who coordinated these scams
- Google and Tesla hold huge stakes in Afghan mining deals for products that Google and Tesla sell directly, or indirectly
- White House staff and advisor's held, or hold, stock in the companies related to Google and Tesla
- U.S. Senators charged with corruption, held, or hold, stock in the companies related to Google and Tesla and had major conflicts of interest with the Companies given funds by Steven Chu
- Solyndra was raided by the FBI. Solyndra was created to exploit indium and lithium from Afghanistan
- California State Officials held, or hold, stock in the companies related to Google and Tesla and had major conflicts of interest with the Companies given funds by Steven Chu
- Steven Chu held, or holds, stock in the companies related to Google and Tesla and had major conflicts of interest with the Companies given funds by himself while working at the

Department of Energy

- Steven Chu and Department of Energy staff sabotaged most companies that competed with Afghanistan lithium mining holdings of campaign investors
- Google holds various interests in Elon Musk's companies and his suppliers and runs a duplicate government kick-back focused "driver-less car" project to exploit lithium mining
- Google and Elon Musk's companies would not be in existence today if not for state and federal government hand-outs at taxpayer expense
- White House senior executives have ordered federal agencies to "stand down", "take no action", "cover up" or "punish reporters" in these charges
- Goldman Sachs had a managing, profit-taking and political campaign finance relationship with every suspect, every Afghan commodity manipulation charge and every Google and Tesla owner
- Google manipulated the Internet to attack and destroy politicians, reporters, companies and individuals who competed with Google, Elon Musk or Kleiner Perkins-related assets
- The Attorney General of the U.S. ran a cover-up of crimes by campaign financiers
- Tesla and Solyndra have the same property, supplier, Senate, construction, leasing, HR service and related political kick-back deals in effect
- U.S. taxpayers lost trillions of dollars, jobs, 401K asset value and suffered other damages because of these crimes

If any of the above dispute any of these widely documented, and verified charges, they should appear on live TV before a Special Prosecutor and make their case. Plaintiffs will subpoena dozens of law enforcement, news, congressional staff, and special investigator records which are known to contain recordings and eye-witness proof of the above stated crimes in multiple mirrored locations.

"If Google, Tesla and The White House were not involved in this, then why did they put a hit job on the witnesses that cost tens of millions of dollars to implement. What other possible reason, on Earth, could there be that could explain why these particular entities went to this much trouble to try to destroy this particular handful of regular American citizens? Is this the kind of representation American voters signed up for? Are cover-ups and attacks on the public the new norm?" - Attorney

In all of recorded history, there has never been so much taxpayer cash given to so few people, where each, and every, one of the recipients was a friend of the politician giving away the taxpayer cash and everyone who got the cash immediately skimmed "unjust profits" and shut down the business. On top of that, every applicant, who was not a friend of the politician, was considered a competitor, and was attacked and sabotaged, using state and federal resources. This was a felony-class crime that has cost taxpayers trillions of dollars in losses. Evidence proving this, as fact, many times over, is available to be presented before the Special Prosecutor in a public hearing. Find out why "electric cars, driver-less cars and indium" were not only not green, but the dirtiest kind of war profiteering mining scam in political history!

This is a documentation site detailing the crimes in the [CleanTech Crash Corruption Case](#). These crimes, and cover-ups, by [elected officials](#), and their [Silicon Valley billionaire financiers](#), were part of an illicit taxpayer fraud scheme. To-date, these crimes has cost taxpayers over one trillion dollars in losses, corrupted the public policy system, halted domestic innovation and jobs and risked national security.

Over half a decade of investigation, by multiple state, federal, congressional, private and news investigators now has revealed these crimes by a corrupt group of officials.

XP, FST, Bright, Apterra, Zap, EcoMotors, and the rest, had technologies which, history has proven, were lower cost, massively safer, longer running, cleaner, greener, more job creating, in greater demand by consumers and voters, easier to manufacture, U.S. patent awarded, federally and Congressionally commended, better for national security, more innovative and less toxic than the campaign financiers competing companies who got the taxpayer cash and favors. The non-crony's technologies obsoleted the technologies that the corrupted crony Senators, and their Silicon Valley campaign financiers, held stock market positions in. So those political crony's said: *"Kill them!"*. This resulted in actual, as well as figurative, [deaths](#), bankruptcies, hired character assassinations and income interdictions that were ordered, and paid for, by public officials. The politicians, and their campaign crony's, couldn't compete; so they resorted to "hit-jobs" to take out their competitors.

History has proven the crony's to have been disastrously wrong. They have gone bankrupt; been caught in tax fraud; had their kick-back funded products blow up and go through massive recalls; and become the butt of media jokes around the globe. They have cost taxpayers over a [trillion dollars in losses](#). Dozens of the most famous names in Washington, DC have been forced to quit their jobs, mid term, in shame, because of their corrupt mismanagement of this scandal. Some have now been indicted. The criminality of the crony's was overt, audacious and malicious.

The names, communications and covert financial connections of the [White House staff, Department of Energy officers, Silicon Valley kick-back billionaires and DOJ officers](#) who planned, implemented and covered-up these crimes, have now been made public in the news media. Their names are freely discussed here. These perpetrators have refused to allow us a public hearing, or a fair trial, and refuse to allow the public the benefit of a Special Prosecutor. Thus, the entire Alliance has deployed publishing, social media and network technology which guarantees that this information can never be erased from the history books, reaches more people daily, exists in millions of locations and that the perpetrators will never evade justice, no matter how long it takes.

"Read the inside reports, emails, investigator's notes, testimony and shocking details of epic political corruption, now, legally, available to the world, and permanently recorded in the history books."

A Case Example:

One of the victims: XP, presented Congress, and the Department of Energy, with 400 times more letters from waiting customers (who were voters, consumers and fleet buyers) than any other applicant. They had more positive press coverage, more issued patents, more sustainable energy grants and more top auto industry experienced leaders in their project. They had the best debt-ratio finance metrics, of any applicant, according to the U.S. Treasury. In spite of having superior metrics on every level, Steven Chu had them kicked out of the program because ***"Their car was not planning on using enough gasoline"***, according to the U.S. Department of Energy.

Since the program was for ***alternative energy vehicles***, and XP was building an ***electric car***, that rejection comment was a bit ***audacious***.

It seemed that DOE officials never even read the XP proposal. DOE crony's simply kicked them out, along with EVERY SINGLE OTHER NON-CRONY APPLICANT, because the money had secretly already been "hard-wired" and promised-in-advance to Chu's crony's. The business partners of the top Department of Energy staff placed "moles" in XP and ran media "hit-jobs" on XP, now traced back to the suspects, in retribution for XP helping federal investigators with their inquiries. XP sued the Department of Energy for Corruption, forced the documentation of the corruption to be filed on ***permanent*** public record, and worked with federal investigators, journalists and the public to get over 22 of the top bureaucrats, who engaged in the corruption, fired. XP's case is still unresolved but every month brings ***new laws, policy changes and voter demands*** which seek to make certain that corruption, such as this, can never happen again!

APPLICANTS HAVE NOW FILED FORMAL CRIMINAL, CIVIL RIGHTS VIOLATIONS AND ETHICS CHARGES AGAINST FORMER U.S. ATTORNEY GENERAL: ERIC HOLDER. READ THIS BOOKLET TO SEE WHY:
