

Devastating Congressional Hearings Plan To Expose The Google - Twitter - Facebook Collusion To Damage American Democracy

By Ainsley Dunsbury

Denials and further obfuscations about their overt manipulations of election information and news bias will no longer serve the **Silicon Valley Paypal Cartel**.

Congress now has some mighty weapons in it's hand for the exposure of the Silicon Deep State.

Google/Alphabet, Twitter and Facebook have been ordered to appear before the offices of the people but their **"Didn' Do Nuffin"** attitude will no longer help them. Congress has a bundle of hard facts and evidence in hand this time.

Hard evidence includes: Ex-employee testimony; details from the James Damore, and other, lawsuits; a slew of evidence videos (ie: <https://www.real.video/channel/tuffnews1>); reports by the editor of Psychology Today: Dr. Robert Epstein; Russian FSB analysis documents, university research documents, forensic analysis, internal leaked emails and texts from top Google, Twitter and Facebook executives and VC's; and more.

One forensic study, which has produced thousands of pages of results states: *"...We placed autonomous monitoring applications on co-location servers, shared hosting ISP's, stand-alone servers and sites around the world over ten years ago and monitored: 1.) Google's search results compared to other search engines, 2.) Google's DNS and spoofing activities, 3.) Google's results on 100 key search terms including search terms of assets, candidates and business associates connected to Google (ie: "Obama", "Elon Musk", "Election Results", etc.), 4.) Where Google sends data from users clicking on Google supplied links, 5.) Where fabricated "mole" data that was injected as user data ultimately ended up later, and other metrics. The results prove that Google abuses the market, the public, politics and human rights...."*

It is now virtually impossible for the Silicon Valley tech oligarchs to deny their collusion and actions to rig elections, news and information in order to seek to benefit their owners personal financial and ideological interests.

The hard analysis of over a decade of comparative data studies proves, beyond any doubt, that Facebook, Google and Twitter: 1.) Only hire leftist extremists 2.) Finance and get government payola from leftist candidates 3.) Are run by leftist extremists 4.) Have a 90%, or higher, bias towards leftist propaganda 5.) Have meetings and organized events together to collude on political tactics 5.) hold covert trust funds, shell corporations, family trusts and real estate assets which hide the profits from such actions and 6.) are the primary participants in some of the largest left-wing DARK MONEY PAC's in the world.

In a series of Congressional Hearings, starting with the new U.S. House Judiciary Committee hearing, The Silicon Valley Oligarchs can expect leaks and whistle-blower data to begin to peel the onion of their operation and reveal the deepest secrets of their frat boy collusion club. Silicon Valley's lobbyists are thought to be the parties most responsible for tainting and compromising the FBI by using insider trading incentives to steer policy.

Silicon Valley Oligarch Cartel: Facebook, Twitter, Alphabet to testify at U.S. House hearing

WASHINGTON (Reuters) - The U.S. House Judiciary Committee will hold a hearing on Tuesday to take testimony from Facebook Inc <FB.O>, Alphabet Inc's YouTube unit <GOOGL.O> and Twitter Inc <TWTR.N> on whether social media companies are filtering content for political reasons, the committee chairman said.

Conservative Republicans in Congress have criticized social media companies for what they claim are politically motivated practices in removing some content, a charge the companies have rejected.

House Judiciary Committee chairman Bob Goodlatte said in a statement on Friday that he was pleased the companies will send experts "to answer questions on their content moderation practices and how they can be better stewards of free speech in the United States and abroad."

Twitter declined to comment. Facebook on Friday confirmed they would participate but declined further comment. Alphabet did not immediately comment.

Facebook's head of global policy management (and "Professional Liar For Facebook") Monika Bickert, Youtube global head of public policy and government relations Juniper Downs and Twitter's senior strategist Nick Pickles will testify, the committee said.

The committee held a hearing in April on the same topic after representatives of the companies skipped it.

Republicans repeatedly suggested at the hearing that the companies are censoring or blocking content from conservatives, a charge the companies rejected.

Lawmakers from both parties agreed tech companies must remove illegal content like fraud, piracy and sex trafficking but differed on whether they should remove objectionable content.

Goodlatte said "while these companies may have legal, economic, and ideological reasons to manage their content like a traditional media outlet, we must nevertheless weigh as a nation whether the standards they apply endanger our free and open society and its culture of freedom of expression."

Nadler added "conservative commentary, including conspiracy theories of a conservative bent, regularly rank among the most far-reaching posts on Facebook and elsewhere."

Facebook Chief Executive Mark Zuckerberg told Congress in April that he is "very committed to making sure that Facebook is a platform for all ideas."
