Google's filthy political propaganda war on the public empire is massive

In the quarter century since Google was founded, the company has grown mind-bogglingly big. Every day, billions of people around the world ask questions on Google Search, send an email with Gmail or navigate their commute using Google Maps. The tech giant dominates the internet economy, consistently spends more than almost any other group or company on lobbying and over the years has rapidly expanded its business by buying hundreds of other firms. In 2023, it generated \$307 billion in revenue, the equivalent of the gross domestic product of Finland.

[News orgs warn GOOGLE's AI search will have 'catastrophic' consequences...](#)

The judge's ruling, which is expected in the coming months, could put new limits on Google's ability to run its search empire. The company may be barred from paying billions to secure prime placement for its search bar on Apple's iPhones or other web browsers. It could even be forced to sell off part of its business, like the Chrome browser, and open up competition to other search engines. The judge could also rule that Google isn't a monopoly after all, which would be a major setback for the government and antitrust advocates who say the power of Big Tech has grown too large.

Either way, the case will be influential on a series of other major lawsuits against other Big Tech companies, including [Amazon](#) and [Apple](#).

Google alone has nine billion-user products. Here's what they are.

Google search— 4.9 billion users

This is the business at the center of the government's allegations. Google is the world's most important search engine, and it truly dominates the space, controlling 92 percent of the market, which equates to 4.9 billion people, according to StatCounter and the International Telecommunications Union. Microsoft's Bing comes in second with a paltry 3 percent, while a handful of country-specific players like Yandex in Russia or Baidu in China round out the final few percentage points. Google is far and away the world's most-visited website, with over 86 billion visits a month, according to internet data provider Similarweb. The company's control of search has allowed it to rake in cash year after year and use that money to expand into other businesses through acquisitions.

Now, the company is beginning to upend search even more. CEO Sundar Pichai said in April the company will begin putting AI-generated answers, which are trained on content scraped from the web, at the top of search results for more of its users. That could upend the web, hurting publishers who rely on traffic from Google for their survival. The AI answers have been in a public test for 11 months, but it still [makes up facts](#) and misinterprets questions.

Chrome — 3.4 billion users

Google owns the world's most popular web browser. The vast majority of desktop computers and a huge portion of mobile phones have Chrome set as the default way for users to interact with the internet. Around 3.4 billion people used Chrome as their web browser as of 2023, according to StatCounter and the International Telecommunications Union. Owning Chrome gives Google the ability to keep its search engine front and center, but also allows it to track people all over the internet, gaining incredible amounts of granular data on online behavior, especially when it comes to advertising and e-commerce. As Chrome took over the internet, web developers began building websites so they would run optimally on the Google-owned browser, and caring less about making them work smoothly on rivals like Microsoft Explorer or Mozilla's Firefox. Eventually, even Microsoft threw in the towel. Its new browser, Edge, is built off a version of Chrome. Analysts have said if the judge rules Google is an illegal monopoly, there's a chance the company could be forced to split up its business, such as turning Chrome into a separate entity.

Android — 3 billion users

More than 3 billion people use smartphones running Google's Android operating system, the company said in 2021. That's around 70 percent of all the smartphones in the world. Apple's iOS is a distant second at 28.5 percent. Like Apple, Google uses its operating system for its own smartphones. But it also makes the software available to other phone and tablet companies, and that's where Android's true power comes in. Because Android has become the default operating system for most of the world's phones, Google can put its other services, like Search, Maps, YouTube and its app store, in front of billions of people.

Google Play Store — 2.5 billion

Around 2.5 billion people use Google's version of the app store every month, [the company says](#), making it much bigger than Apple's app store. The Play Store lets Google charge a commission on every app sold, as well as get a cut of transactions made through those apps. The power Google has over the mobile app ecosystem is so great the company has been the target of major lawsuits, alleging it's using that power to squeeze app developers and take more money from them than they would if the market was more competitive. Android phones are different than iPhones — they don't require apps to be downloaded by the official app store, and in China, numerous other app stores exist. But in most of the rest of the world, using an Android phone means going through Google to get your apps.

YouTube — 2 billion users

Google's online video service is a juggernaut in its own right, with 2 billion users, according to [the company](#). YouTube says 500 hours of video is uploaded to YouTube [every minute](#). Much of it isn't very high quality, but it shows just how massive a role YouTube plays as an entertainment site, social media platform and video archive. If you added together the run-time of all 454 feature films released in the United States in 2022, at an average of two hours per film, you'd get around 900 hours of content. Less than everything uploaded to YouTube in 2 minutes.

Google Workspace — 3 billion users

Google's archenemy is Microsoft, and the company has for years worked to compete with Microsoft's core products — its productivity suite including Word, Excel and PowerPoint. Though Google still hasn't dethroned those products, its own tools have grown rapidly over the years, benefiting from being bundled into other Google services like Gmail. At the end of 2022, [Google said](#) its "Workspace" apps, which include Docs, Sheets and Google Drive, had more than 3 billion users.

Gmail — 1.8 billion

Email was the original reason for many people to go online in the first place. Companies like Microsoft and Yahoo fought vicious battles in the early years of the commercial internet to build huge email businesses. Google was late to the game, but when it began offering much larger amounts of free storage than its competitors, it quickly began winning over customers. Now, Gmail is the undisputed king of the email world, with 1.8 billion users according to marketing research firm [DemandSage](#).

And the company wields huge power over the internet simply by being in control of the rules that dictate which emails end up in users' primary inboxes and which are sent to the spam folder.

Google Photos — 1 billion users

Google's photo-storage app grew to a billion users just four years after launching in 2015, a company executive [told Fast Company](#) in 2019. It benefited from being wrapped into Google Drive, and as a default photo-storage tool on Android phones. But the app is hugely popular with iPhone users too, thanks to Google's offer of large amounts of free storage. Now, millions of people pay Google monthly just to preserve the photos they've stored in the tool, providing a major extra boost to revenue. Google Photos is also a major proving ground for the company's AI tools. The company is using the app to test out new features like making it easier to edit out certain people from photos, and even making it look like people are smiling when in reality they were frowning when the photo was taken.

Google Maps — 1 billion users

Google was also late to the map game, with rivals like MapQuest already running major businesses when it first came on the scene. But the company gradually took over the space, and now it's the dominant tool people use to navigate the real world. Google crossed the billion [monthly users mark in 2012](#), and the company's user base in the space has only grown since then. Even on iPhones, where Apple has tried for years to get people to use its own default maps app, many people still download Google Maps and use it exclusively. Maps soon turned into a huge reviews site, shaking the businesses of companies like Yelp and TripAdvisor, and putting Google into competition with a whole different set of companies. Like most of Google's businesses, Maps is also an advertising platform.

What's next

The Department of Justice's trial, which focused on Google Search, isn't the only legal challenge the company is facing. In September, it went on trial for allegedly using its control over the internet advertising system to benefit its own products and squeeze out competitors. The case is being compared to Microsoft's fight with the government 20 years ago.

Google argues that the internet is a lot bigger than it is, and that companies like Amazon, Netflix, TikTok and new upstarts like ChatGPT-maker OpenAI are all competing with it for people's time, attention and money. Still, Google's empire extends far and wide. It has a self-driving car company, one that does medical research and its own venture capital firm. It buys and rents fleets of ships to lay undersea cables across oceans to ensure its data travels as fast as possible.

THE AWFUL TRUTH ABOUT THE SICK PEOPLE BEHIND GOOGLE

Corrupt political families conspire to give government funds, contracts, tax waivers, buildings, stock market profits and other insider perks to themselves and their friends. They also conspire to blockade, harm, sabotage and black-list those who compete with them and their friends. These corrupt politicians are never prosecuted for their crimes, and can laugh in the face of those who point out their crimes, because they control the prosecution system. Their Quid Pro Quo criminal corruption is the single largest cause of the taxpayer hatred of Congress.

Google, and it's Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Google's bosses bribe politicians, regulators and law enforcement officials to hold off prosecution.

At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergey Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done.

Between all of the sex cult activity; hookers; rent boys; political bribes to Pelosi, Harris, Newson, and Feinstein; DDoS attacks they run; CIA and NSA stealth deals; privacy harvesting; Scientology-like employee indoctrination; cheap Asian labor; covert Axiom scams and other illicit things they get up to; one just has to wonder.

Some of the largest political bribes in American or European history were paid via billions of dollars of pre-IPO cleantech stock, insider trading, real estate, Google search engine rigging and shadow-banning, sex workers, revolving door jobs, nepotism, state-supported black-listing of competitors and under-the-table cash. Why are these Silicon Valley Oligarchs and their K-Street law firms and lobbyists immune from the law?

U.S. Senators, Agency Heads and Congress are bribed by Google intermediaries with: Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures stock and stock warrants which is never reported to the FEC; Billions of dollars of Google, Twitter, Facebook, Tesla, Netflix and Sony Pictures search engine rigging and shadow-banning which is never reported to the FEC; Free rent; Male and female prostitutes; Cars; Dinners; Party Financing; Sports Event Tickets; Political campaign printing and mailing services "Donations"; Secret PAC Financing; Jobs in Corporations in Silicon Valley For The Family Members of Those Who Take Bribes And Those Who Take Bribes; "Consulting" contracts from McKinsey as fronted pay-off gigs; Overpriced "Speaking Engagements" which are really just pay-offs conduited for donors; Private jet rides and use of Government fuel depots (ie: Google handed out NASA jet fuel to staff); Real Estate; Fake mortgages; The use of Cayman, Boca Des Tores, Swiss and related money-laundering accounts; The use of HSBC, Wells Fargo, Goldman Sachs and Deutsche Bank money laundering accounts and covert stock accounts; Free spam and bulk mailing services owned by Silicon Valley corporations; Use of high tech law firms such as Perkins Coie, Wilson Sonsini, MoFo, Covington & Burling, etc. to conduit bribes to officials; and other means now documented by us, The FBI, the FTC, The SEC, The FEC and journalists.

Google and Youtube are based on technology and business models that Google and YouTube stole from small inventors who had launched other companies that were up and operating before YouTube or Google even existed as business operations.

Google holds the record for the largest number of corporate sex scandals, abuses and sex trafficking charges.

There are only two kinds of people that work at Google: 1.) Cult indoctrinated naive kids with odd sexual quirks and 2.) divisive managers and executives who seek to exploit those eco-chambered employees for nefarious political and stock market manipulation purposes under the Scientology-like guise of "doing good things", when, in fact, they are engaged in horrific

crimes against society.

Google has hired almost every technology law firm in order to "conflict them out" from ever working to sue Google. If Google rapes you, robs your patents or does anything awful, you won't be able to find a lawyer to help you.

Most Google executives in control of Google have been indoctrinated by family dynasties to believe that any crime is justified by a bigger cause. Most of those executives are men. The few women in control of departments are figure-heads.

Google bosses attend the same parties and business meetings in which they collude, co-lobby, rig markets and make anti-trust violating plans together.

Google is a private government with more money and power than most smaller nations. Google has more lobbyists bribing more politicians than any other company in America.

Jared Cohen and fashion show-horse Yasmin Green at Google had the job of over-throwing countries in the Middle East. They openly bragged about it. (<https://truthstreammedia.com/2013/06/02/googles-regime-change-agent-jared-cohen/>)

People that work at Google get paid \$260,000.00+ per year to lie, spy, manipulate politics, bribe politicians and engage in other crimes. For that kind of money, a person will do ANYTHING and rationalize it as "part of the higher cause".

The Project X investigation team is publicly quoted as stating: **"...give the same number of lawyers as Google has, with the same level of skills and experience, the same discovery budget, legal expenses budget and expert witness budget, we ABSOLUTELY GUARANTEE that we can put Google staff and investors in federal prison and close Google, in bankruptcy...the Google Cartel has engaged in that much criminal activity..."**

"Google is the largest financier of the Obama political campaign and exceeded FEC campaign spending limits by tens of billions of dollars. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

Google is the largest staffing source of the Obama Administration. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

The largest number of laws and policy decisions, benefiting a single company and its investors, went to: Google. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

Google, and its investor's are the single largest beneficiary of the Obama Administration. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

The Obama Administration only won the White House because Google and Facebook engaged in the largest digital media and search engine manipulation in human history. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing.

Google, and its investors, during the Obama Administration, had most of their competitors denied funding, grants, contracts and tax waivers while Google's investors GOT funding. We can prove this in a jury trial, a Grand Jury hearing and a live Congressional hearing and prove that Google coordinated anti-trust violations with senior Obama Administration White House staff..."

Google operates its staffing like a Scientology cult. They control their employees lives, information, transportation, free time, entertainment and social life. A Google life is a glass-bubble of echo-chamber extremist, hyper-sex-kink, reinforcement.

They were politically manipulative answers designed to make it known they're doing what we've said they were doing all along, but they feel justified in doing it because "hate speech" must be stopped at all costs. Of course, what constitutes hate speech to the social justice warriors in big tech invariably circles around conservative thought. There is no form of hate speech short of physical threats that can be attributed to progressives, at least not in the minds of the people who control big tech. If conservatives are aggressive, they're delivering hate speech. If progressives are aggressive, they're just being truthful. That's what big tech thinks.

This is the worst-case scenario for conservatives. Before, we could call them liars and cheats. Now, we have to fight them on an ideological level, and while we have the truth on our side, they have the technology. They have the eyeballs. They control what people see and don't see. And as such, they can no longer be trusted to deliver anything even remotely close to fair and balanced. They're unhinged from reality, but instead of coming back to reality once exposed, they're building a new reality around their ideologies.

Russia may arrest Google employees for running Google as a manipulative service containing hidden political insertions affecting the human subconscious

- **Russian government will now arrest those who try to 'control minds' via mass web manipulation**
- **Google was created to push liberal leftist political messages on the subconscious**
- **Research exposes Google as insidious mind-control political skill**

A Russian journalist has been accused of 'controlling minds' and 'affecting the human subconscious' after referencing George Orwell's 1984 in an article.

Mikhail Romanov, a reporter for the Yakutsk Vecherniy weekly, was writing a story on the alleged torture of an academic.

Police in [Russia's](#) republic of Sakha charged Romanov after they suspected him of trying to tap into the readers' sub-conscience, Russian newspaper [Kommersant](#) reported.

A Russian journalist has been accused of 'controlling minds' and 'affecting the human subconscious' after referencing George Orwell's 1984 (pictured) in an article

Romanov's editor told the publication: 'This is a story about how anyone can be squashed by the government machine.'

'It's also about how Big Brother is watching, reading all comments on online forums.'

This is understood to be the first time a journalist will be tried under Russia's new legislation punishing those who are perceived to have published information 'containing hidden insertions affecting the human subconscious.'

The case has been forwarded to a Yakutsk city court.

Google likely ‘thoroughly infiltrated’ by Chinese govt., expert warns

[alex stamos](#), [big tech](#), [china](#), [cybersecurity](#), [facebook](#), [google](#), [internet](#), [peter thiel](#), [richard clarke](#), [russia](#)

(LifeSiteNews) – Tech billionaire Peter Thiel recently called on the federal government to investigate Google for potential infiltration by the Chinese government, and now security experts are saying his concerns are well-founded.

Thiel, one of President Donald Trump’s most high-profile [gay supporters](#) and an [avowed critic](#) of Silicon Valley, made the remarks at last weekend’s National Conservatism Conference, [Axios reports](#). He called on the FBI and CIA to ask Google, “how many foreign intelligence agencies have infiltrated your Manhattan Project for AI”; “does Google’s senior management consider itself to have been thoroughly infiltrated by Chinese intelligence”; and whether this alleged infiltration is why the company works with China’s military but not America’s.

“I’m not sure quite how to put this, I would like them to be asked [these questions] in a not excessively gentle manner,” Thiel added.

Alex Stamos, a researcher with the Stanford Internet Observatory and [former chief security officer at Facebook](#), said Tuesday it was “completely reasonable” to assume that both the Chinese and Russian governments have, in some form or another, already infiltrated not only Google but every top tech company:

Note that “subverted” is very different than planting professional spies in “The Americans” style. Each of the big companies employs thousands of employees with family members under the control of these countries, and a gov request might be simple and seem borderline reasonable.

— Alex Stamos (@alexstamos) [July 16, 2019](#)

I expect that there will be a major combined HUMINT/InfoSec attack against a major tech company revealed in the next couple of years, which will trigger the same awakening that Project Aurora did in 2009.

— Alex Stamos (@alexstamos) [July 16, 2019](#)

BTW, I don’t blame the foreign-born employees at all. They are just trying to make a good living doing interesting work. If MSS had “my” Mom I would do whatever they asked.

— Alex Stamos (@alexstamos) [July 16, 2019](#)

Stamos predicted that the “next couple of years” would see the revelation of a “major combined HUMINT/InfoSec [human intelligence/information security] attack against a major tech company.”

He’s not the only one who advises that Thiel’s warnings be taken seriously. Richard Clarke, a former counterterrorism and cybersecurity advisor to both Democrat and Republican presidents, [told CNBC](#) Wednesday there was cause for concern.

“Here’s what I think is true: Google refused to work for the Pentagon on artificial intelligence,” Clarke said. “If you turn around and you work on artificial intelligence in China, and you don’t really know what they’re going to do with that, I think there’s an issue.”

The internet giant has denied working with the Chinese military, but opened an artificial intelligence center in Shanghai in 2017 despite the Communist regime’s strict speech and internet controls. On Tuesday, Google executive Karan Bhatia [testified](#) to the Senate Judiciary Committee that the company has terminated a [controversial](#) censored search engine it had been working on for China.

Clarke added that there was no meaningful distinction between Google working with Chinese companies and the Chinese government, given the level of state control in the country.

The specter of foreign influence on the tech industry further intensifies its ongoing controversies regarding [political bias and censorship](#) and [violations of user privacy](#). Responding to Thiel’s original comments, President Trump [said Tuesday](#) that his administration will “take a look” at the matter.

Google being biased is glaringly obvious even to a retard. Google forcing their employees to support them politically is a human rights violation.

Th old railroad barons a hundred years ago were bad people, but no where near as abusive as google is to the employees. The old railroad tycoons had their supporters too who thought strikers and protesters against their tyranny were awful people.

Silicon Valley just indoctrinated their followers and employees by brainwashing them first like any cult does. “Do no evil” was always a smarmy block of shit in pixels, no different than the purple dinosaur singing “I love you, you love me”. The purple dinosaur never loved you one little bit. It was a lie, and parents had no business being such gullible suckers and allowing their children to be lied to by an actor in a fuzzy suit.

forcing their employees to support them politically is a human rights violation.

>Civil and political rights are a class of rights that **protect individuals' freedom** from infringement by governments, social organizations, and private individuals. They ensure one's **entitlement to** participate in the **civil and political** life of the society and state **without discrimination or repression**.

From the first time they censored, shadow-banned people who opposed their way of viewing world, far-left, SJW, leftards has put cornerstone to **civil rights movement 2.0**, including people who are at the rock bottom and uppermost stairs of oppression. Clearly, this is infringement of rights by gov and private entities, which has been ignored from by the time it was apparent that such violation is well spread and not a unique case.

Those at silicon valley had no idea that their attempt to have conservative and alike voice removed/deplatformed is **someway resemble how "white" and "colored" segregation works**; which is no brainer considering that they did not pay any attention to "obscure" details and only remember famous persons who was oppressed at that time.

So, don't spout only "Hate speech is Freee speech". Tell them that when some peers mock center-right personalities by reenacting what happened prior to Civil Rights Act of 1968,throwing liquids to nigger who ignored the sign, isn't a good joke since **political affiliation is covered in protected class** in District of Columbia, IA,WV state, which put them as the white fellas and anyone who didn't entirely agree with them as the blacks in this reenactment.

If anyone reading this is somehow connected to parliament from local council to state, **consider amending the laws to add political affiliation as one of class covered by "(unfounded)hate crimes"**. We won't need to see bike lock attacker and his copycat got sweetheart deals. Share this to Trump, since who doesn't love for shit and giggles watching leftards kvetching having cognitive dissonance episode explaining why adding another class would hurt other classes that already existed in last statue

Regarding Google – Alphabet – Youtube and their Cartel, the issues, that the public and the news media have complained about include: producing child suicides and classroom shootings, racism, misogyny, child mental health threats, domestic spying, data harvesting, sex trafficking, election manipulation, tax evasion, Fusion GPS/Media Matters/ Black Cube hit jobs on competitors, censorship, contrived market monopolization, intellectual property theft, political bribery and many other social crimes!

-- An unusually large number of their staff have been arrested for, or charged with, sex crimes, including under-age trafficking.

---- They seem to be an organized crime entity protected by the politicians that they pay bribes to.

---- This entity is one of the largest operators of bribes to public officials. Some of those bribes include billions of dollars of, non-FEC reported, search engine rigging for the political campaigns of the very politicians who are supposed to regulate them.

---- "Google is a sick corrupt criminal business run by sex trafficking perverts and sociopaths..." Say GOOGLE'S own inside employees, Divorce Court records of Google executives, 70+ State and Federal investigations and major news outlets.

---- Google spies on competitors and steals their technology.

---- Google – Alphabet – YouTube stock is owned by almost all of the California politicians and their families and that is why Google – Alphabet – YouTube is never regulated and always protected by them for their political and profiteering manipulations -

---- Google runs tens of millions of dollars of defamation attacks against competitors

---- Google hides all media and news coverage for competitors of Larry Page's boyfriend: Elon Musk

---- Google lies to the public about what they really do with the public's data

---- Google promotes illegal immigration in order to get cheap labor and control votes

---- Google runs VC funding back-lists against start-ups that are competitive

---- Google bribes thousands of politicians

---- Google is a criminal RICO-violating monopoly – Google rigs the stock market with Flash-boy, Pump/Dump and Microblast SEC violating computer tricks -

--- Google has a "no poaching" Silicon Valley jobs blacklist

--- Google bosses sexually abuse women and young boys --- Google bosses run sex trafficking operations in the Epstein and NXVIUM cults

--- Google bosses control the NVCA financing cartel over start-ups -

--- Google has placed the majority of the corporate staff in at least one White House

--- Google controls national elections for anti-competitive purposes

--- The company "Polyhop", in the HOUSE OF CARDS tv show, does all the crimes that Google actually does in reality

--- Google's law firms, like Wilson Sonsini, are corrupt conduits for payola and political conduit-relays

--- Google bribes some politicians with revolving door jobs

--- Google is primarily responsible for destroying the Bay Area Housing opportunities

--- Google runs DDoS attacks on competitors by massively crawling their sites

--- Google boss Andy Rubin runs a sex slave farm according to his own family -

--- Google boss Eric Schmidt was a philandering sex-penthouse owner according to vast news articles

--- Google executives hire so many hookers that one of them, Mr. Hayes, was killed by his hooker

--- Google executives sexually abuse so many women that the women staff of Google walked out one day

--- In the 2009 White House, you could not swing a cat without hitting a Google insider

--- Google has paid covert bribes, PAC funds, real estate and search rigging payola to every CA Senator

--- Google has paid bribes, through its lobby fronts, to halt FBI, SEC, FEC and FTC investigations of Google crimes

--- Google was funded by the CIA, via In-Q-Tel, a so called "501 c3 charity" which was caught with tons of cocaine

--- Google gets millions of dollars of taxpayer cash for spying on Americans inside the USA -

--- Google's map service was a spy system paid for by taxpayers money that Google now profits off of

--- Nancy Pelosi and Dianne Feinstein have promised to "protect" Google because their families profit off Google stocks

--- Payment receipts prove that Google and Gawker/Gizmodo exchanged cash and staff for Character Assassination attacks

--- Google VC's and bosses have spent \$30M+ rigging the U.S. Patent Office to protect Google and harm Google competitors

--- Google bribed it's lawyer into position as head of the U.S. Patent office in order to have her protect Google -- To rig insider stock trades, Google hides negative Tesla stories and pumps positive Tesla stories on "push days" -

--- Google and Elon Musk Co-own, co-invest and co-market stocks covertly while running anti-trust schemes

--- Google rarely likes, or hires, black employees per federal and news media investigations

--- Google hired most of the Washington, DC K Street lobby firms and told them to "do what ever they could"

--- The film: "Miss Sloane" depicts only 2% of the illicit lobbying tactics Google employs daily

--- Demands for an FTC and FBI raid of Google, for criminal activity, securities law and election felonies have been filed

--- Google's David Drummond had his Woodside, CA Quail Road house bugged revealing sex and financial misdeeds

--- Google, and it's Cartel (Alphabet, Youtube, and hundreds of other shell-company facades) are a criminal organization engaged in felony-class crimes. Google's bosses bribe politicians, regulators and law enforcement officials to hold off prosecution.

---At Google: Kent Walker, Andy Rubin, Larry Page, Eric Schmidt, Sergy Brin, Jared Cohen, Yasmin Green, David Drummond and Ian Fette are so enmeshed in sex scandals, election manipulation, and White House bribes that it is hard to comprehend how they can get any legitimate work done.

--- There are hundreds of millions of people in America. The same 120 of them are all involved in operating the same crimes and corruption including: the Sony Pictures corruption; the Afghanistan rare earth mine scandals operated through The Energy Department political slush fund that involves the lithium battery cover-ups (headed by Elon Musk); the Big Tech Brotopia rape, sex trafficking, bribery, exclusionism, racism and misogyny issues they were taught at Stanford University;

--- The Facebook – Meta – Google – Alphabet – Netflix, et al, coordinated news manipulation and domestic spying that they engage in; the hiring of Fusion GPS – Black Cube – Gizmodo/Gawker assassins; the destruction of the housing market by their mass real estate manipulations; patent theft and industrial espionage; and the bribery of almost every politician all the way up to the Oval Office. --- So, while the categories covered in this investigation may seem diverse.

They are connected through an enterprise of criminality and illicit, coordinated operations. We list, by name, the 120 most complicit individuals organizing these crimes, in the evidence documents already submitted to the FBI, FINCEN, DOJ, FTC, SEC, FEC, Congress, InterPol and other authorities. Digital financial tracking of those persons and all of their family members should be assumed to have been under way for some time. Wire-taps and device taps of those persons and all of their family members should be assumed to have been under way for some time. -

--- Twitter, Splunk, Google, Facebook, Netflix, YouTube and the Silicon Valley internet Cartel serve you custom manipulated content by automatically creating a covert digital dossier on you reflecting the content consumption preferences they have spied on about you. They continually evolve their dossier on you in order to steer you towards their ideology and their Democrat political party. At these companies, "data mining", "machine learning" and "AI" means computerized propaganda processing for certain political entities. They began hiring off-shore people (because they would work so cheap) but most of those people turned out to be Muslim. This created conflicts with the entire southern part of the United States (which is anti-Muslim) because those workers steered content to pro-Muslim positions.

--- Their spy dossier on you uses abstract content-specific features of the consumed content, such as categories, topic models, and entities, which they automatically extract using natural language processing by comparing every word you use to a giant computer library of what those words might mean about your psychology. So it's like you are getting "mind-raped" without any penis use. Their assessment of what your words might mean is based on what rich, white male, \$200K/year, DNC-promoting programmers think they might mean.

Their computers scale and expand their tools with algorithmic software created by those politically and socially biased frat white boys that wrote the code. It is all biased as hell. They never hire blacks or women in system creation roles so everything these companies do only supports rich white soyboy snowflake type gamer thinking. --- Because their Silicon Valley VC's told them to spy on billions of people, even for these web giants, it is impractical to store the entire dynamic history of a user's interaction features. They, thus, out of greed, use algorithms that selectively decay information in order to generalize users and populations. To them, you are just a generalized data point, like cattle on a ranch, to be harvested and fed upon by Silicon Valley.

You can try to sue Google for anti-trust, racketeering and other illicit deeds and Google will hire tens of millions of dollars of lawyers to blockade you from getting to a Jury Trial. The best thing you can do is assist the Federal Government, many State Attorney General's and citizen's groups with their lawsuits against The Google Cartel.

Bloomberg, The Wall Street Journal, Stratfor, Wikileaks, FTC and SEC investigators and Kroll Intelligence says that Google runs the largest domestic spying operation in the world; larger than that of even Russia, China, Israel or Iran. The Google Cartel has set up thousands of companies in a spiderweb of surveillance, around the globe, and in space, that knows everything that everyone is thinking, doing or might do; and how to place media and events in front of them to subliminally steer people to do, or think, things that they might not otherwise have thought, done or voted for. Many of these operations were financed by IN-Q-TEL, which is the CIA and the NVCA combined. For example, A Google derivative called 'JigSaw' is run by Pro-Israel, Anti-Arab operatives and steers data to certain interested parties. Larry Page is on multiple Arab secret police "kill lists", which means they should terminate him if the opportunity arises. Barack Obama had Eric Schmidt in the basement of his campaign HQ on election night, running computers, and has secretly claimed that "Google put him in office". Most of the key White House staff came from Google. Google claims to 'not be political', but it is the most political business Cartel on Earth. Google finances politicians that will do what Google tells them to do. It finances them with billions of dollars of internet manipulation, insider stock favors and by getting every staff member to give max limits to their campaign PACS.

It became independent from Project X in 2018. It is currently testing in Australia; X Development Holdings Inc. - USA - Holding company - X Development LLC - USA - Called "Moonshot Factory." The company says it is working on solving the world's hardest problems using technology but seems to just be an outlet for Larry Page to steal and copy technologies with. Wing, Loom, and Waymo, which are now separate businesses, started as X projects; XXVI Holdings, Inc. - USA - Layer between Alphabet Inc. and individual companies of Alphabet. The system is designed to lower regulatory or disclosure requirements, tax evasion, money laundering and for hiding political payola. The name of the company is referring to the Roman numeral of 26, the number of letters in the alphabet.

Google LLC has over 200 direct and indirect subsidiaries in order to limit where lawsuits and federal actions can go. The Mafia uses this same approach. Almost everything Google owns is involved in acquiring, and analyzing your personal and business data for the Google surveillance computers. It is almost impossible to find a Google group that does not 'feed the data beast'. Larry Page and Eric Schmidt believe that no citizen is intelligent enough to live in the world and that they must covertly 'guide' populations to their own ideology and "Master Plan". The rest of the Google Cartel for global domination includes:

DeepMind Technologies Limited GBR Artificial intelligence/Machine Learning

DoubleClick Holding Corp. - USA - Online advertising company that Google acquired a decade ago. It recently announced that it is rebranding its advertising products, and it will no longer use DoubleClick brand.

Dropcam, Inc. - USA - Home monitoring. Company is known for its Wi-Fi video streaming cameras. Was acquired by Nest soon after Nest was acquired by Google. This acquisition is often given as an example of how an acquisition can go wrong.

Google Asia Pacific Pte. Ltd SGP Singapore company that channels revenues (royalties) from Asia/Pacific region (through the Netherlands) to Ireland Holdings Unlimited. It has a similar purpose to Google Ireland Limited in Europe.

Google Bermuda Limited BMU Hard to say, where in the company hierarchy this sits. Might be the parent company of Google Bermuda Unlimited

Google Dialer Inc. - USA - Not sure exactly but connected to Google Fiber and Google Voice.

Google Fiber Inc. - USA - Internet Access Provider

Google Fiber North America Inc. - USA - Internet Access Provider

Google International LLC - USA - Holdings company for Google's subsidiaries in individual countries outside the US.

Google Ireland Holdings Unlimited Comp. - IRL - This is a very "famous" Google subsidiary that is incorporated in Ireland but managed and controlled in Bermuda. Google at least up to recently used this subsidiary as part of the "Double Irish" with "Dutch Sandwich" tax optimization scheme that is very common among large international companies. The company serves partially as a holding company for some international businesses but mainly as a holder of Google intellectual property that it further licensed to other Google companies for a fee.

Google Ireland Limited - IRL - Google Services Provider for Europe and Switzerland. It books a lot of revenue, but makes very small profits, since it pays a lot to Google Netherlands BV for Google's intellectual property. Google Netherlands BV then channels this revenue to Google Ireland Unlimited that is incorporated in Ireland but domiciled in Bermuda.

Google Netherlands Holdings B.V.NLD This company is used as a middle layer between Google Ireland Limited and Google Ireland Holdings. This allows Alphabet to pay very low taxes

from its European operations thanks to a tax optimization scheme called "Double Irish" with "Dutch Sandwich." This loophole was very popular among international technology companies and was already fixed for new arrangements.

Google North America Inc.- USA - Provider of Google FI service (wireless network)

Google Payment Corp.- USA - Google's companies that handle money transfers and peer-to-peer transactions. In US payments are processed by Google Payment Corp. (GPC), which has the appropriate license for transmitting money and for peer-to-peer transactions in US.

Google Payment Ireland Limited - IRL - Providing Google Payment Services for whole European Union (except UK) as a replacement for Google Payment UK. UK subsidiary will keep providing services for UK.

Google Voice Inc.- USA - Provider of Google Voice service.

GU Holdings Inc.- USA - Through this company, Google is building subsea cable infrastructure. For example, in 2019, they finished the connection between Los Angeles and Chile.

Nest Labs (Europe) Limited - IRL - "virtual subsidiary" of Nest Labs. Owned by Google Ireland Holdings Unlimited, so not directly under

Nest Labs

Nest Labs Inc.- USA - Company flagship product and company's first offering before it was acquired by Google was Nest Learning Thermostat. Nest operated independently of Google from 2015 to 2018. However, in 2018, Nest was merged into Google's home-devices. (Still not sure if it was only organizational merger or also legal merger)

Nest Labs Singapore Pte. Ltd.SGPvirtual "subsidiary" of Nest Labs. Owned by Google Ireland Holdings Unlimited.

Verily Life Sciences LLC - USA - -Research company developing tools that focus on health data and how they can help with timely decision-making and effective interventions. (formerly Google Live Sciences)

Waze Mobile Ltd.ISRGPS navigation software. Waze describes its app as a community-driven GPS navigation app, which is free to download and use. Waze is owned directly by Google LLC.

YouTube, LLC - USA - -Youtube is a very successful video sharing and hosting service that Google acquired in 2006. This acquisition became hugely successful for Google. But not everybody was persuaded that the acquisition made sense at the time.

Alphabet Holding LLC is a holding company that is a direct subsidiary of XXVI Holdings, Inc. It is focused mainly on managing Google/Alphabet investments. Both Alphabet investment managing firms CapitalG and GV are housed under this holding. CapitalG and GV invest in other companies, but since those are usually small stakes below 50%, these companies are not part of Alphabet Group. Before 2015, there was no Alphabet, and Google Inc. was a publicly-traded company that you could directly own by buying its shares. All subsidiaries were subsidiaries to Google Inc. In 2015 Google transformed into Alphabet, where Alphabet Inc became the top parent company that was publicly traded. Google Inc. shareholders became overnight Alphabet Inc shareholders.

In reality, many "Other Bets" businesses still stayed as subsidiaries of Google LLC even after the 2015 transformation, and it was only recently when the whole transformation was finalized. Finally, "Other Bets" companies were moved from outside Google LLC.

The reasons for this complex transformation were described by Google management as an "increase in transparency and oversight," That would be achieved by putting larger projects at the same level as Goole LLC with their separate management, reporting directly to Alphabet Inc management. The proclaimed increase in transparency was only internal for Google management. Transparency for investors did not increase. Another reason behind the transformation was obviously limiting risk. By separating Google into different companies, each one of them is independent of each other. If someone gets arrested in one company, the others would be protected from it.

Double Irish & Dutch Sandwich is a very popular and publicized arrangement through which mostly US companies were optimizing their taxes from European businesses. It involved two Irish and one Dutch company. Wikipedia has a nice article on both Double Irish and Dutch Sandwich, explaining how it works. In Alphabet/Google case. Companies involved in Double Irish with Dutch Sandwich arrangement are assumed to be:

Google Ireland Holding Unlimited (Irish company with Bermuda domicile)

Any issues re: culpability can be easily resolved in meetings with the FBI, FINCEN, The SEC, The IRS, The FTC, ICIJ.ORG and open Congressional hearings! Never was the term: "Follow The Money" more appropriate than for these people! Why are these people not yet arrested for election manipulation, RICO and Anti-trust violations, money laundering, bribery and other illicit deeds? Who is protecting them? Who is telling the police not to act? This list also serves as a demand for investigation and prosecution of these individuals who conspired to engage in these illicit acts. This is not the complete list.
