

## HOW TO GET RID OF AND PLACE YOUTUBE

We have had this discussion before and the problem is obvious. It costs 6 billion \$. But...what if, for starters you only permitted political commentators who had over 50 000 subscribers on youtube? At the very minimum, they wouldn't need storage, just bandwidth.

Then when audience gathers, allow any person with 50 000 subs even if their content is non political. As the audience expands, and the add revenue comes in, lower the limit to 10 000.

The same thing could be done with twitter. That shirthole never made a cent anyway so it would be limited to "BIG" political commentators only at first for twitter wars. Then all "BIG" users. Then.....

And maybe we just let it civilization collapse while hiding in the hills and sniping anything we see that is non white....good times.

Edit: no, the RightWingTube doesn't mean that leftist scum would be censored with the intention of creating an echo chamber, tho with freedom to say what you mean it would probably eventually turn into one in a similar manner that voat did. But that would not be the goal.
