

HOW TO PROTECT YOUR IDEAS AND IP FROM SILICON VALLEY VENTURE CAPITALISTS

“DUE DILIGENCE” actually means “WE ARE GOING TO FIGURE OUT HOW TO COPY AND EXPLOIT YOUR TECHNOLOGY ON OUR OWN”.

The only background check that an investor or partner needs to conduct should be:

- Do they take drugs?
- Are they an alcoholic?
- Have they been arrested?
- What are their politics?
- How much are they competing with us?

Never reveal your technology methods, tools, schematics, source code, business plan, marketing ideas, development growth iterations or ANYTHING to an investor or partner until they have signed a rock-solid NDA and secrecy agreement and agreed, in writing, to compensate you for any losses made by leaks to their associates. Use “Disinformation” to delay theft of your IP.
