

# Tesla Motors under yet another investigation in new safety probe

- It's focusing on the brakes and steering, including the Autopilot system

South Korea has launched a safety probe into Tesla, focusing on braking and steering systems including Autopilot, according to [Reuters](#). The transport ministry is specifically looking at the the Model 3 in an investigation that could take from six months to a year. The news casts a bit of a shadow on Tesla's huge [sales surge](#) in the nation, spurred on by the Model 3.

Tesla has an excellent safety record overall, but the autopilot system has drawn [criticism](#) from the the US National Transportation Safety Board (NTSB). More recently, Tesla's Autopilot marketing was decried as "[misleading](#)" by Korea's Fair Trade Commission. Tesla will cooperate with the investigation, according to a South Korean transport ministry official.

Tesla has dominated EV sales in Korea, taking over [50 percent](#) of the market and selling over 22,000 vehicles in the first half of 2020. That's helped in part by 8 million KRW (\$6,700) in government subsidies for each Model 3 buyer, along with Tesla's own [investments](#) in 22 superchargers and 172 slow-charging

stations in the country. The investigation is still in the early stages, so it's hard to say yet what impact it will have on Tesla.
