The Map of Physics

A map of everything we know about physics and how it all relates to each other.

If you would like, you can buy a poster version here:

www.redbubble.com/people/dominicwalliman/works/24105984-t...

And this image came from an explainer animation video I made in which I go into more details:

I love it. Very succinct. Extraordinary to realise how much we know, but what a tiny proportion that is of what there is to know.

super nice figure.

statistical mechanics?

[Monkey D. Jiotaro Tonthat](#) 4y

can I use it as my laptop wallpaper? even I think sticking it on the cover, too :)

[WorfTrek of Anmore](#) 4y

Many thanks!

nice good work
thanks

[Hoang Parisien](#) 3y

what are the tools you did for those beautiful maps? Thank a lot!

[özgür yıldırım](#) 2y

Can we use these posters for school? And can you upload its newer version on the redbubble.com? Finally, many thanks.

Physicist, artist, and all-around Renaissance man Bern Porter drew up a map of physics in 1939. It was cited and reproduced in the January 2019 issue of Physics Today (p. 30-37), as representing an outmoded view of physics, before the advent and rise of condensed matter physics (via solid state physics).

physicstoday.scitation.org/doi/10.1063/PT.3.4110

The map was also printed as a frontispiece to one of the bestselling physics textbooks co-authored by Marsh White

(College Technical Physics, i believe, from McGraw-Hill).
You can also see the map here:

Bern Porter had quite a history and along career, particularly in the arts, during his 93-year-long life. During World War II he had a small role in the Manhattan Project (he found out what it was for the day after the bomb was used on Hiroshima) and later in the Apollo Project. Meanwhile he claimed to have invented mail art, hung out in Gertrude Stein's salon in Paris, befriended and then published Henry Miller and Anais Nin, and went on to a long career as an avant-garde artist with "found poems" and many other projects.
