GOP says Holder: "Director of Cover-Ups"

HOLDER_CRAZY_EYES

Senior GOP officials have stated that "no one is more responsible for distrust of the current Administration than Holder". With White Staff quitting or "retiring" in droves, GOP officials state that it is time to zero in on the source. One senate chief of state said he had never seen more stonewalling in any known administration.

Investigators claim to have been stone-walled by Holder on investigations into **IRS, Benghazi, Solyndra, Fisker, Department of Energy, GunWalker, Severstal, Abound**, and "**over 200 other investigations**". Freedom of Information requests have been permanently frozen in Holder's office according to a highly placed Senator. This Senator stated: "*Even though FBI agents have full reports connecting Solyndra, Abound, Fisker, Tesla and other DOE funding deals with a [lithium/Afghan monopoly](#) scandal, they are being told not to release them. The public is owed such information.*"

While Holder may be covering his bosses asses, he may not have noticed that most of the people he was supposed to cover when he started, are gone.

Let's discuss...
