PAYBACK POLITICS "HIT JOBS"

Our group of small business entities has been attacked, in multiple ways, because they reported the crimes and the attacks on them.In addition to media hits, job database hits and character assassination hits; people we know are missing, or dead, including [Gary D. Conley](#). Gary was found with a bullet in his head behind a Northern California Air Force base (CLICK FOR CONLEY MEMORIAL SITE). David Bird, a Wall Street Energy Reporter, covering parts of this story is missing.. There are a number of other dead and missing people associated with this matter. Federal and Local law enforcement are fully aware of these matters.

There is a website detailing the attack techniques, that have been used by the attackers on our group, it is located at:

<http://www.paybackpolitics.org>

In one of the most audacious attacks, the attackers used some of their political front groups to engage in this attack via a rogue spy group. <http://www.inqtelcase.wordpress.com>

Crazy billionaires really do these sorts of things in order to steal billions of dollars and to grab political power.

"Corrupt politicians, and criminals, who engage in crimes in the dark will always, eventually, have to face the light. Welcome to the AGE OF TRANSPARENCY" This site has been replicated on a vast number of mirror servers. Any take-down attempts will be trace-routed back to source and crime-reported. Constitutionally charged and the individuals, and their sponsors litigated, against. Hard bound copies from LULU, and other printing services, as well as DVD's of this site, and the top 4 reference sites, are provided, on request, to all members of The U.S. Congress, weekly. Multiple federal law enforcement agencies are now advising. All material provided by agencies, reporters and witnesses. No illegal material is on this site, but investigators do have much material in hand that the public has yet to see.

MEDIA COVERAGE OF THE INCIDENT:

SET ONE (Click on each article header for link to story):

SET FOUR:

basis. Thus, providing managers with access to aggregated, updated data could facilitate more efficient management of the LGP.

Furthermore, without consolidated data about applicants, LGP actions, and application status, LGP staff may not be able to identify weaknesses, if any, in the program's application review process and approval procedures. For example, consolidated data on application status would provide a comprehensive snapshot of which steps of the review process are taking longer than expected and may need to be addressed. If program data were consolidated in an electronic tracking system, program managers could quickly access information important to managing the LGP, such as the current amount of credit subsidy obligated, as well as whether the agency is consistently complying with certain procedural requirements under its policies and regulations that govern the program. In addition, the program cannot quickly respond to requests for information about the program as a whole from Congress or program auditors.

In March 2011, the LGP acknowledged the need for such a system. According to the March 2011 LGP summary of its proposed data management project, as the number of applications, volume of data and records, and number of employees increased, the existing method for storing and organizing program data and documents had become inadequate, and needed to be replaced. In October 2011, LGP officials stated that while the LGP has not maintained a consolidated application tracking database across all solicitations, the program has started to develop a more comprehensive business management system that includes a records management system called "Portal" that also could be used to track the status of applications. Officials did not provide a timetable for using iPortal to track the status of applications but said that work is under way on it. However, said iPortal or some other system can track applications' status, the LGP staff cannot be assured that consolidated information on application status necessary to better manage the program will be available.
