Kanye finds time in busy schedule of twattishness to release album

KANYE West has found a window in his schedule of twattery to release some of his music.

West took a short break from his punishing timetable of incoherent arrogance to release *The Life of Pablo*, which critics said was not as artistically impressive as his ongoing quest to become the perfect twat.

One industry insider said: "Making a modern pop album can take as long as 45 minutes.

"That's the equivalent of a year to such a committed tosspot. If you're going to do it, it's got to be worth the sacrifice."

But music critic Martin Bishop said: "The album is what you'd expect from someone with a vague grasp of rhythm and the self-awareness of an over-privileged nine year-old.

"Five stars."
