

THE CLEAN CORRUPTION

Thu, 18 Jun 2015 17:00:00, newstips66, [category: brotopia, category: elon-musk, category: energy-dept-slush-fund, category: google-alphabet, category: idea-theft, post_tag: key-stories, category: lithium-batteries, category: senator-insider-trading, post_tag: the-clean-corruption, category: worldnews]

DOCUMENTS AND PRESS CLIPPINGS:

Who Were the Crimes Reported To, In writing:

A large number of individuals reported the "CleanTech Kickback Crimes" in writing, years ago, and they have provided proof of those communications. They wrote letters and time-stamped emails to:

- Eric Holder, DOJ. Action Taken: Cover Up, then quit
- Erick Strickland, NHTSA. Action Taken: Quit
- Robert Gibbs & His Staff in White House. Action Taken: Quit
- Barack Obama. Action Taken: No known action
- David Axelrod, White House. Action Taken: Quit
- Steven Chu, Secret of Energy. Action Taken: Cover Up, then quit
- Senator Daryll Issa. Action Taken: Began investigation, stone-walled
- Senator Jim Jordan. Action Taken: Began investigation, stone-walled
- Senator Jeff Bingaman. Action Taken: Began investigation, stone-walled
- Jay Carney, White House. Action Taken: Quit
- Senator Dianne Feinstein. Action Taken: Intimidation and warnings to witnesses
- Daniel Cohen, Senior Lawyer, U.S. Department of Energy. Action Taken: Quit
- New York Times. Action Taken: Reporter intimidation by suspects and re-direction
- Washington Post. Action Taken: Reporter intimidation by suspects and re-direction
- Inspector General, Department of Energy. Action Taken: No known action
- FBI. Action Taken: Began investigation, stone-walled. Two arrests.
- New York Attorney General. Began investigation, stone-walled. Five arrests. Three indictments. Pending investigations

And more...

There are more than a hundred other names of famous politicians and agency heads, many of whom are now quoted in the press saying, about other cases, "*if only they had come to us first and reported this, we could have gotten it all fixed..*"

At least two of the people who whistle-blew died strangely, and unexpectedly.

So, if reporting crimes does not work. What is the answer?

WITNESSES HAVE CHARGED THE FOLLOWING IN AT LEAST THREE POLICE REPORTS:

- John Doerr's, Kleiner Perkins Silicon Valley Cartel found to have made up Solyndra and Tesla in order to scam state and federal taxpayer cash
- Part of campaign financing scheme which kicked money back to Obama, Feinstein, Reid, Brown, Lockyer and multiple other Senators. Financial records, HSBC, databases now prove it.
- Leaks and whistle-blowers reveal all
- Investigators "Chart-of-Benefits" shows who got each round of kick-backs and pay-offs
- "Anti-Poaching" investigation reveals new Silicon Secrets about the scheme
- "AngelGate" scandal was just the tip, Solyndra/Tesla shoved it all the way in
- Former Department of Energy staff show proof Musk was nearly bankrupt when he applied for nearly free federal cash. Steven Chu told Detroit to make a stock shell deal with Musk so the books would balance for a few months so Tesla would pass "on paper". Total scam.
- Musk proven to be absolute liar about state of finances and shown to have "cooked the book", like Solyndra did, with help of State officials, to hide failures.
- State law enforcement ordered not to investigate, by their bosses, in order to protect corrupt Senators
- "These were false-front operations that used engineers to create a façade, and got rid of the ones that figured out what was up. Multiple unexplained deaths involved.
- Solyndra raided by FBI but you never saw the whole story... yet
- Emails, Texts, Phone stingray files
- Both Solyndra and Tesla booked state and federal handouts as "sales & profits"
- Got tax credits, hard cash, soft case, waivers, carbon credits, employment payment waivers, free rent, free property, exclusive contract awards worth far more than the \$5B currently in the news. Scam profits and give-aways may be as high as \$45B

Ex-Tesla Execs Win Reinstatement Of Contract Claims

By Leigh Kamping-Carder

Law360, New York (May 06, 2011, 8:05 PM ET) -- A California appeals court on Thursday dismissed the defamation claims of two Tesla Motors Inc. executives fired in a round of layoffs in 2008 but reinstated claims that the electric-car maker breached a stock options agreement.

Statements Tesla made about a group of 26 fired employees were clearly opinion, not fact, and did not name former Director of Communications David Vespremi and former Chief Information Officer Gene Glauzell directly, entitling the company to free speech protections, the appeals court ruled.

Vespremi and Glauzell joined Tesla in...

Inside the U.S. Antitrust Probe of Google

Key FTC staff wanted to sue Internet giant after finding "real harm to consumers and to innovation"

By BROOY MULLINS, ROUFE WINKLER and BRENT KENDALL
Updated March 19, 2015 7:35 p.m. ET

WASHINGTON—Officials at the Federal Trade Commission concluded in 2012 that Google Inc. used anticompetitive tactics and abused its monopoly power in ways that harmed Internet users and rivals, a far harsher analysis of Google's business than was previously known.

The staff report from the agency's bureau of competition recommended the commission bring a lawsuit challenging three Google practices. The move would have triggered one of the highest-profile antitrust cases since the Justice Department sued Microsoft Corp. in the 1990s.

The 160-page critique, which was supposed to remain private but was inadvertently disclosed in an open-records request, concluded that Google's "conduct has resulted—and will result—in real harm to consumers and to innovation in the online search and advertising markets."

BUSINESS INSIDER **Elon Musk**
CEO, Tesla Motors, SpaceX, Chairman, SolarCity

Tesla and SpaceX were on the verge of bankruptcy in 2008 and Elon Musk was about to lose all his money, but the founder made sure that his employees would be taken care of, if the companies failed.

Produced by Kamelia Angelova, Alana Kakoyiannis and Justin Gmoser

Musk caught in multiple recorded statements saying Tesla was in near bankruptcy at the start of DOE funding: A violation of the Section 136 law AND that he had rigged massive pay-out packages when he got caught.

ELON MUSK DIDN'T CREATE TESLA. HE TOOK AWAY FROM MARTIN, THE ACTUAL CREATOR, IN A HOSTILE TAKEOVER SCHEME

TESLA HAS HAD MULTIPLE RECALLS BUT CORRUPT SENATORS KEEP THAT FACT HUSHED UP:

Important Safety Recall Notice Regarding Your Universal Mobile Connector NEMA 14-50 Adapter

Dear Model S Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Tesla Motors has decided that a defect which relates to motor vehicle safety exists in your Tesla Model S vehicle. Under increased electrical resistance circumstances, the NEMA 14-50 adapter for the Universal Mobile Connector (UMC) provided with your Model S vehicle, or the electrical wall receptacle, could overheat. An overheated adapter or wall outlet could impact the UMC cord as well and result in an increased risk of burn injury and/or fire.

WHAT TESLA MOTORS WILL DO

First, Tesla Motors has developed a software update that allows the Model S onboard charging system to detect any unexpected fluctuations in the input power or higher resistance connections to the vehicle. If detected, the onboard charging system automatically reduces the charging current by 25%. For example, this reduces a 40 amp charge rate to 30 amps. This dramatically reduces the heat generated in any high resistance connections outside of the vehicle.

Second, Tesla is replacing the NEMA 14-50 adapters with ones of an improved design. Tesla will begin mailing the new adapters in the next two weeks. New adapters can be readily distinguished by the grey connector face as shown in the picture below.

When Wall Street Makes Crap Loans, It's a Crisis; When DOE's Steven Chu Does It, It's Green Energy.

Nick Gillespie | March 15, 2012

Via [Instagram](#) linking to [The Fiscal Times](#) comes documentation of just what an easy grader Department of Energy (DOE) Secretary Steven Chu really is. As you'll recall, a while back the Nobel laureate cum bureaucrat was asked by Rep. Paul Brown (R-Ohio) to grade his performance at DOE. Chu's humble response? "There's always room for improvement, maybe an A-."

The Fiscal Times' Edward Morrissey writes about the new Government Accountability Office report on the performance of DOE's loan-guarantee program which gave way to Solyndra and other debacles. Suffice it to say, GAO wasn't grading on a curve set by the performance of Obama's cabinet. Snippets:

The GAO looked at the handling of \$30 billion outstanding in loan guarantees and future commitments and discovered that the DOE rarely follows its own written procedures for writing and auditing applications. In fact, in many cases, the Loan Guarantor Program (LGP) couldn't even find the data managers needed to administer the loans properly...

In almost every case study investigated by the GAO, important steps got skipped in the reviews that determined whether loan applications would be granted. In other cases, the documentation was so poor that the GAO couldn't figure out what the LGP did...

The process had at least an 85 percent failure rate on its process check. Most people would not associate that level of process accuracy with a grade of A-minus...

With \$30 billion in taxpayer money at risk, the DOE under Steven Chu didn't bother to conduct the reviews it claimed it would on applications for loan guarantees, didn't keep records of what reviews they did accomplish, and signed off on loans with incomplete documentation and inadequate oversight of the risk. The result — perhaps \$6.2 billion immediately at risk, according to CRS, and possibly most of the \$30 billion.

Morrissey drives home the point that when it comes to lending standards and the viliication of private financial institutions processing mortgages that were either backed or bought up by government-sponsored enterprises, the Obama admin is firmly in the "do as we say, not as we do" camp:

What makes [DOE's] carelessness and

TESLA & SOLYNDRA SIT RIGHT NEXT DOOR TO EACH OTHER, ON SENATOR FEINSTEIN'S PROPERTY, RUN BY HER HUSBAND.

Silicon Valley VC's live in Woodside, Calif. No blacks are to be found there. In the parking lot of their little store, their Tesla's and Fisker self-explode while you are shopping for your Chai Tea. Here is another \$100K car that had its lithium ion batteries "go thermal" for no reason.

Airbus to drop lithium-ion batteries for A350 due to regulatory concerns

Text Size Print E-mail Reprints

By Associated Press, Updated: Thursday, February 14, 6:44 PM

NEW YORK — Airbus is dropping lithium-ion batteries from its new A350 airplane because of uncertainty surrounding the technology that has led to the grounding of Boeing's 787.

The European planemaker said late Thursday that it has decided to revert to nickel-cadmium batteries for the A350. The plane is a wide-body jet rival to the 787 and is expected to make its first flight around the middle of the year.

Tweet 0 More

Gallery

Airbus says it does not expect the battery switch to delay the A350.

Federal officials grounded the 787 last month because of problems with its lithium-ion batteries that caused one fire and forced another plane to make an emergency landing.

Airbus says the A350 uses batteries in a different setup to the 787, making it unlikely that it would face the same problems.

Latest \$269 Million DOE Loan Causes Major Controversy

[f](#) FACEBOOK [in](#) LINKEDIN [t](#) TWITTER [g+](#) GOOGLE+ [r](#) REDDIT [su](#) STUMBLEUPON

By **Darrell Delamaide**
Posted on Mon, 13 April 2015 20:31 | [1](#)

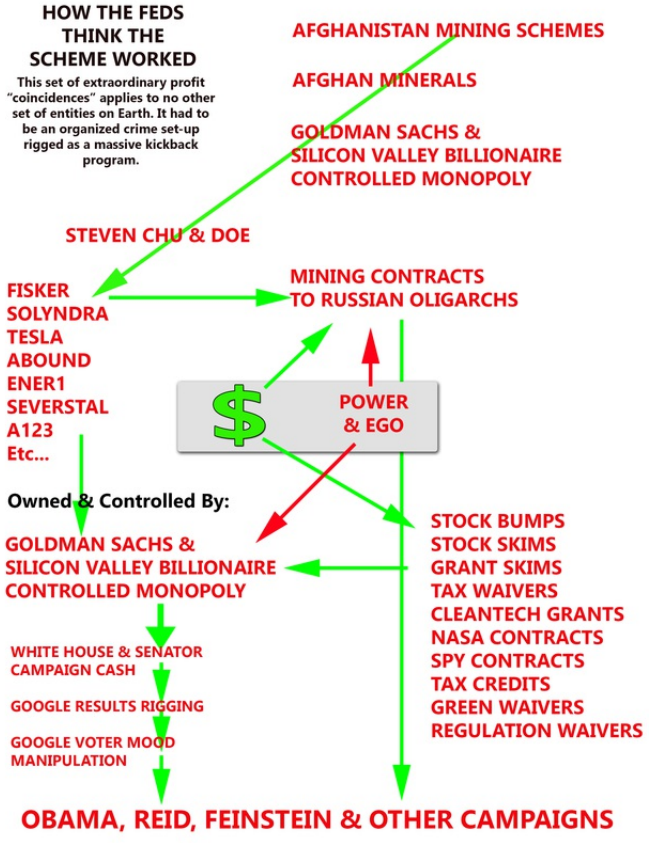

No doubt smarting from criticism about its lack of success in picking winners in alternative energy vehicles, the Department of Energy has given initial approval for a \$269 million loan to a proven winner – Alcoa’s high-strength aluminum to [make vehicles lighter and more fuel efficient](#).

The loan in fact covers the costs for new factory capacity at Alcoa’s Tennessee plant, which the company announced nearly two years ago and which is due for completion in mid-2015.

ENERGY + GENIUS
 CLICK HERE FOR FULL CONTENTS
 The lithium craze explains only a portion of Potash's interest in taking over SOM. The Chilean company gets 50% of its revenue from fertilizers, compared to 11% from lithium. But it's clear that investors are intrigued by SQM's rapidly expanding operations in the Atacama desert. Chile boasts at least ten more salars that have yet to be explored for lithium reserves. If GM is right and drivers are willing to pay a steep premium for lithium-powered cars, SQM could be poised for a windfall.

Goldman Sachs' Operations: Clean Energy
 Energy Storage (TSLA, GEN, EBY, LID, WEL, CLG, TRX, HBY, SCNE, FCS, RFP, HBB, SQM, FPC, BAC, CCL)
 We have another report on Energy Storage which provides a view from Goldman Sachs on the world's lithium. The lithium space is being set back developing even when Japanese Toyoharu Ito was in a rush to secure lithium supply.
 Note: Goldman Sachs operations also cover Japan. It follows a path from the market for lithium. Note: Goldman Sachs also covers the market for lithium.

News broadcasts claim that Kiener Perkins worked with Russian Mobsters to rig the lithium & indium mining commodities, assisted by Goldman Sachs. Indeed, Kleiner's partner Steven Chu, gave emergency taxpayer money to Russian billionaires, so there is some merit to the story.

Tesla CEO in Digital Witch Hunt

Owen Thomas

Filed to: LEAKS 3/04/09 9:30am

29,228 🔥 2 ★

Enraged by leaks at his troubled Silicon Valley electric carmaker, CEO Elon Musk cooked up a sophisticated electronic scheme to catch the blabbers. It backfired hilariously on the brilliant entrepreneur, who's a bit blabby himself.

Tesla Motors is an icon of the new Silicon Valley, which is placing its bets on clean, green technology. Its \$109,000 Tesla Roadster runs wholly on electricity and

accelerates from 0 to 60 miles per hour in less than four seconds. But the company is in deep financial trouble, and is betting its future on government loans that may not materialize. Musk, the company's lead investor, took over as CEO last fall. But his reign has been marked by constant and, as Musk himself had admitted, deadly accurate disclosures of Tesla's parlous condition.

A tipster writes:

Life for the employees at Tesla Motors has got more depressing over the last few months. Elon Musk is now spying on everyone.

Girl treated for second-degree burns after iPhone explodes in pocket

posted on Feb 3rd 2014 by Kevin Krause [Share This Story](#) [Tweet](#)

A 14-year old girl in Kennebunk, Maine was settling in for another normal school day late last week when she heard a pop emanate from her pocket. Her friends immediately noticed smoke billowing from the girls' pants and realized they had caught fire. When all was said and done the girl, who remains unidentified, was in the hospital. A charred iPhone 5c was on the classroom floor.

According to witnesses as well as emergency responders, it was an iPhone 5c, given to the girl less than two months prior, that ignited in what can be considered a freak occurrence. The most likely culprit was the handset's lithium-ion battery.

Not to be ungrateful for the \$465 million of tax-payers' money, Musk was sure to add "The DOE was a helpful catalyst," and that without it, Tesla's IPO "wouldn't have been as good."

With the 2010 Tesla Model S Luxury Sedan set to enter production this year and the 2013 Tesla Model X Crossover [already unveiled](#), it isn't difficult to see why Musk's keen to look to Tesla's less-glim prospects. After all, history tends to be written by the victors.

But while we understand Musk's keenness to distance Tesla from other, less-successful DOE ATVM loan recipients, his next move baffled us.

"Musk said that generally he doesn't believe government subsidies are good, but in some cases they do help," reports [The Wall Street Journal](#).

Instead of offering federal loans which artificially pick and choose winners and losers in the marketplace, he argued, companies should be allowed to survive on their own merits. The implication, of course, was that startups should rely on private investment, not government funds. In addition, he proposes taxing business and individuals on the carbon dioxide they produce, encouraging individuals to make greener choices through taxation.

Had Tesla not taken funds from the DOE, Musk's statements would be entirely understandable.

n Musk: Daimler Saved Tesla, DoE Loans A Bad Idea <http://www.greencarrep>

Given Tesla's participation in the program however, it doesn't seem all that fair for Musk to criticize the hand that - at least in part - helped to keep the company running.

In fact, we can't help but think that Musk's recent revelation is nothing short of an attempt to distance Tesla from the DOE and its now-politically toxic ATVM loan program ahead of the 2010 Presidential campaign.

A PROVEN MUSK & DOERR STRATEGY: SABOTAGE YOUR COMPETITORS WITH "MOLES", BUGS, AND BY GETTING YOUR SENATOR TO CHANGE FEDERAL LAWS TO HURT THEM.

Who Bricked The Electric Car? You Did! ²

Filed in: [Automobiles](#), [Electric Vehicles](#)

By [Les Kravitz](#), February 23, 2012 @ 11:20am

[Like](#)

Tesla Motors might be hiding a big battery issue from their customers. Apparently, the company's electric vehicles, including their Roadster and the upcoming Model S, feature a battery pack which if completely discharged might have a huge financial burden on the unfortunate owner. But is the owner unfortunate, or simply a bit careless?

According to an article by Michael Degusta over at [theunderestimation.com](#), if a Tesla electric car, such as the Roadster is parked unplugged, it will eventually become what the company calls a "brick". The vehicle can no more be started or even pushed down the road. This is the result of the car's always-on subsystems which continually feed on the battery.

And when the battery dies, the owner ends up paying Tesla approximately \$40,000 for replacing the battery pack. Reportedly, there is no protection available in its warranty or a car insurance policy for this particular problem. Apparently, at least five Tesla owners were unfortunate enough to end up with this problem. Degusta says Tesla is unwilling to let their customers know about the issue, although they know that it's a big one.

But don't you have a slight feeling that Degusta's argument is nonsense. That's because it is.

If you are familiar with electric cars or batteries or even smartphones, you might know the fact that the battery which is not recharged will eventually die. And since the battery pack on a Roadster is not your usual \$100 laptop battery, people will have to pay a huge price for not finding the time for maintenance.

And a Tesla, as you know, has an electric motor. There is lot less maintenance required for the vehicle when compared to a vehicle with a [combustion engine](#). So it's not too difficult to pay attention to the charge in the battery packs. And the company has designed the car in such a way that it warns the owner (and even the company, in the case of the latest Roadster) when the battery is low. The owners who ended up with a brick might have ignored all the warnings.

So who is culpable here?

Tesla has this to say in response to Degusta's article: "[All automobiles](#) require some level of owner care. For example, combustion vehicles require regular oil changes or the engine will be destroyed. [Electric vehicles](#) should be plugged in and charging when not in use for maximum performance. All batteries are subject to damage if the charge is kept at zero for long periods of time. However, Tesla avoids this problem in virtually all instances with numerous counter-measures. Tesla batteries can remain unplugged for weeks (or even months), without reaching zero state of charge. Owners of Roadster 2.0 and all subsequent Tesla products can request that their vehicle alert Tesla if SOC falls to a low level. All Tesla vehicles emit various visual and audible warnings if the battery pack falls below 2 percent SOC. Tesla provides extensive maintenance recommendations as part of the customer experience".

The Greentech VC Influence Over Washington

By [Katie Fehrenbacher](#) Aug. 18, 2010, 8:28am PDT [No Comments](#)

[Buzz](#) [0](#)

There've been a couple articles in the past few weeks pointing to President Obama as the "clean tech investor in chief" and the presidential VC with bets on [clean energy](#). The real trend is that venture capitalists focusing on greentech seem to have had an unprecedented influence on U.S. federal policy and allocations of the stimulus package.

When I attended the Department of Energy's (DOE) first [ARPA-E conference](#) (Advanced Research Projects Agency-Energy) earlier this year in Washington D.C., I was struck by how many venture capitalists were there. I shared a cab back to the airport with some familiar Silicon Valley faces, and was told if your firm didn't have a dedicated person in Washington — in some circles they call them lobbyists — maneuvering grant and loan programs, you weren't able to be competitive.

Just look at the figures from the stimulus package (which I am fully in support of): somewhere between \$50 billion and \$80 billion into clean power and energy efficiency initiatives ([depending on](#)

As other have noted, this has not been a secret, every Tesla owner knows about this. Second, most reports I have seen, and my own experience, puts the previous vampire loss at about 3kWh, not 4.5. With the latest update, that has been reduced to about 1 kWh. And they are not done optimizing yet.

I think the idea of it being a "secret" comes from the fact that this is a weakness that the general media doesn't cover. Not yet anyway. I think if it were common knowledge that every Tesla born is like plugging in a couple of incandescent light bulbs forever whether you use the car or not, its reputation might be just a little less rosy. Lord knows if it were the Volt with this kind of issue, it would be top headlines on the hour on Fox News.

You may know this author better than I, but I didn't see any evidence that he used an inaccurate methodology. He was very clear about how it was done, and acknowledged that he could use a larger sample size to draw more accurate conclusions. Rather, it seems to me it's your claim that the latest update reduces daily vampire drain to 1 kWh that could use some evidence. I certainly wouldn't take it from a Tesla forum or Tesla corporate, which should automatically come with questions about objectivity. And this 1 kWh figure seems directly in contradiction to the author's findings by a wide margin.

IMO, a lot of time has passed with a known and significant issue (actually a set of related issues it seems), and despite promises and a concerted effort, what seems like it should be an eminently solvable problem has not been solved at all. As someone who's worked in IT for over 30 years, if I were in charge of R&D there, I'd be feeling like I should maybe offer my resignation! There is a tendency to look at Tesla with rose-colored glasses, something I'm seeing even in this thread, and IMO this issue is potentially more of a problem for Tesla than the recent spate of road-incident fires.

Originally Posted by **MrEnergyCzar**

I personally don't consider Tesla vehicles as green. From 10,000 miles out of rear 21" tires to more kWh per mile than other cars to the excess power from the motor and far too large a battery subsystem. Add to that the vampire drain and it just isn't conservative enough for my tastes.

I agree with this. To me the Tesla is less of a green automobile and more of a wasteful alternative fuel sports car.

Re: Tesla model-s-still-loses-power-while-turned-off

What interests me most is that the 23-25 mile loss overnight the writer of the article mentions is in line with what the NY Times mentioned and yet Musk claimed it wasn't so. It's recently been "improved" to a 15 mile loss, but that's still substantial.

Others have pointed out the loss overnight and were pooh-poohed by Silicon Valley types claiming biased reporting. But it seems there is a problem and losing 20 or so miles overnight could be the difference between getting home and getting stranded.

Tesla model-s-still-loses-power-while-turned-off

The Tesla Model S, for all its technical and design artistry, has a dirty little secret: the car has a substantial appetite for kilowatt-hours even when turned off and parked.
Since the Model S was introduced in 2012, this "vampire" power drain from the cars sold so far has consumed roughly 15 gigawatt-hours of electric energy, nearly a day's output for a mid-size nuclear power plant. It's enough wasted energy to drive the cars 50 million miles.

After nine months of promises to fix it, Tesla finally sent out a software update a week ago to the Model S fleet that it claims "significantly reduces power usage when (the car is) shut down."

But based on a week's worth of measurements on my 60-kWh Model S, I've concluded that the new software is only mildly effective.

As far as I can tell, the vampire's fangs are still sharp.

Wasted power

Shortly after taking delivery of my Model S last February, I noticed that I would typically lose 10-15 miles of indicated range overnight. On average, I was losing 23 miles of indicated range every 24 hours.

Google MARKET POWER TAKES A DIVE

THE INCREDIBLE SHINKING Google MARKET POWER TAKES A DIVE

Google's market power has been in a long-term decline since it was first named Google, the search engine was a dominant force in the late 1990s and early 2000s and showed the signs of aging then.

Investors have also been wary of Google's market power, with its share price falling from a peak of \$1,000 in 2007 to around \$500 in 2014. The company's stock price has also fallen from a peak of \$1,000 in 2007 to around \$500 in 2014.

Google's market power has been in a long-term decline since it was first named Google, the search engine was a dominant force in the late 1990s and early 2000s and showed the signs of aging then.

Investors have also been wary of Google's market power, with its share price falling from a peak of \$1,000 in 2007 to around \$500 in 2014. The company's stock price has also fallen from a peak of \$1,000 in 2007 to around \$500 in 2014.

A TUMBLING MARKET CAP

One of the most powerful signs of Google's decline is its tumbling market cap, which has been in a downward trend for the last 7 years.

Google's market cap has fallen from a peak of \$1,000 billion in 2007 to around \$500 billion in 2014.

FALLING REVENUE GROWTH

Google's revenue growth has been in a long-term decline since it was first named Google, the search engine was a dominant force in the late 1990s and early 2000s and showed the signs of aging then.

Investors have also been wary of Google's market power, with its share price falling from a peak of \$1,000 in 2007 to around \$500 in 2014. The company's stock price has also fallen from a peak of \$1,000 in 2007 to around \$500 in 2014.

NO CREDIBILITY LEFT MOST PEOPLE CONSIDER GOOGLE TO BE A SHAM!

Most people consider Google to be a sham!

2008: In 2008, only 11% of Google's White House Bids and Search Engine Rigging was discovered.

2012: From 2012, most of Google's White House Bids and Search Engine Rigging was discovered along with Google's key personnel, Lee Rigging, his assistant, Eric, and Google's CEO, Larry Page, who had been in the White House.

THE FUTURE OF Google

Google's future is uncertain. The company's market cap has fallen from a peak of \$1,000 billion in 2007 to around \$500 billion in 2014.

Google's revenue growth has been in a long-term decline since it was first named Google, the search engine was a dominant force in the late 1990s and early 2000s and showed the signs of aging then.

Investors have also been wary of Google's market power, with its share price falling from a peak of \$1,000 in 2007 to around \$500 in 2014. The company's stock price has also fallen from a peak of \$1,000 in 2007 to around \$500 in 2014.

DEAD

Business pundits feel that the total loss of Google's credibility, its reputation as a front for CIA/NSA & data harvesting activities, its massive owners and its general buggery, will lead to a terminal decline in functionality.

Google falls from grace

Analysis

"I think Google is likely 75% fucked," Paul Kedrosky, a venture capitalist, wrote in an email to *Mashable*. "Nothing's totally fucked, but... they're at a precipice, and no one is calling them on it."

Why Google Is the New Evil Empire

By Steve Tobak / ValleyBeat / Published April 20, 2015 / FOXBusiness

Today we have Google ([GOOGL](#)). Don't let the geeky façade, whimsical multicolored logo and "don't be evil" mantra fool you. Google may very well be the most sinister threat and wicked incarnation of them all.

"We don't need you to type at all because we know where you are. We know where you've been. We can more or less guess what you're thinking about ... Is that over the line?" — Google Chairman Eric Schmidt

A long time ago in a galaxy far, far away there was a Galactic Empire, a beady-eyed Emperor and his heavy-breathing sidekick, Darth Vader. Ever since, we've identified the corporate villains we

Print

Eric Schmidt rigs the Google search engines to promote Elon Musk and Kliener companies and damage whistle-blowers, competitors and political adversaries. Operating as a monopoly and doing the bidding of corrupt politicians is a bit more than a felony

Each whistle-blower in the Cleantech Scandal had a hit-job put on them using federal resources
