

Analyzing How Google Rigged Internet Searches For Elon Musk and his companies from 2007 to today

By The Center For Forensic Internet Analysis

Key Points:

- Thousands of server nodes were employed in the half-decade analytical study
- Google VC's and executives share stock holdings and supplier ownerships with Musk
- Google executives share personal relationships with Musk
- Fraternity boy mentality of Google execs manifests severe male territoriality attacks on all competitors
- Every time a Tesla fire, death or other safety defect was reported, Google would push hype stories, on Google, to the top ranking and down-rank, or hide the defect stories in order to cover Musk's stock valuations
- At same time, Google VC's would pump large stock buys into Tesla in order to artificially inflate the TSLA stock charts to benefit Musk and Google investors
- Google ranking and exposure for 22 Tesla competitors were compared and charted and show a distinct down-ranking of Tesla competitors while, at the same time, up-ranking Tesla, which Google co-owns and benefits from lithium-ion mining, as well
- Stock market manipulation such as this is a felony crime.
- Google is the biggest financier of the Obama Administration, Musk is the biggest personal cash hand-out beneficiary of the Obama Administration. Both have the same stock relationships.
- Most of Musk's Twitter, Facebook and Google text traced back to contracted troll-farms, click-farms and other fake meat puppet volume commercial web presence manipulation services
