

Joe Rogan Exposes The Dirty, Corrupt Trillion Dollar Battery Mining Industry Behind Elon Musk And The Dept of Energy

Thu, 07 Jul 2022 00:44:44, admin45789, [post_tag: corrupt-battery-mining-industry, post_tag: corrupt-trillion-dollar-battery-mining-industry-behind-elon-musk-and-the-dept-of-energy, post_tag: joe-rogan-exposes-the-dirty, category: news]

ELON MUSK AND THE U.S. DEPT OF ENERGY ARE THE LARGEST PRODUCERS OF BLACK SLAVERY AND ILLICIT BLACK CHILD LABOR IN THE WORLD

Per The UN Committee on the Elimination of Racial Discrimination (CERD) and over 400+ Human Rights Organizations: The lithium, cobalt, copper and Rare Earth 'BLOOD MINERAL' fields TODAY produce 100 times more rape, genocide, child labor, and toxic worker poisoning than all the cotton fields in the American Civil War.

Bernard Tse and over 40 of Elon Musk's staff have told him this since 2007. Over 1000 Department of Energy staff and consultants have told Secretaries of Energy Chu, Moniz and Granholm this. This horrific human rights abuse fact has been well known at the Department of Energy for over 100 years!

Today on the Rogan show, over 11 Million people heard these facts exposed, again, to the public.

Elon Musk and the Department of Energy owe Black people reparations for these crimes.

The United States Government and the Department of Energy owe Plaintiff reparations for sending White House "Plumbers" after him for reporting these crimes to authorities.

Elon Musk and the United States Department of Energy lie, delay, defer and obfuscate this horror for one reason and one reason only: PROFITEERING!

The proceeds of these dirty Blood Mineral mines are owned by the families of Harry Reid, Barack Obama, Joe Biden, Dianne Feinstein, Gavin Newsom and other notorious politicians. Their stock portfolio and FINCEN investigations prove it. These also happen to be the same people that tell the United States Department of Energy what to do and who are also invested in Elon Musk.

Interesting? A Coincidence? NO!

They lie and cover-up these facts to make dirty profits! They make TRILLIONS OF DOLLARS IN PROFITS BECAUSE OF THEIR LIES.

They kill these workers for profits!

In the Congo, an estimated 20,000-40,000 children are mining Cobalt for Elon Musk.

<https://youtu.be/RFHwq-8np1o>

About 70% controlled by Chinese Companies.

So you have TRILLIONS OF DOLLARS OF PROFITS being protected by billions of dollars of PR lies, financed by the American taxpayers so that billionaires can buy private jets and "baby ovens" while putting black people in slave camps.

Elon Musk is well known to have anti-black roots and to be under a vast number of lawsuits from his own workers for horrific racism. The Department of Energy has never helped a black-owned electric car company and has always supported car companies with white male board's of directors.

The Department of Energy refuses to make a law or a hard rule that: A.) No battery minerals that enter the USA can come from any fields not certified and inspected by the United Nations as fair labor produced. B.) That no politicians or Dept of Energy staff can own energy and mining stocks which are actually quid pro quo bribes. C.) That the ULTIUM \$2.5B battery deal cannot proceed if it uses Blood Minerals.

DEMAND THAT THE U.S. CONGRESS, AND THE DEPARTMENT OF ENERGY, MAKE FEDERAL LAWS, TODAY, UNDER EMERGENCY HEARINGS, THAT MAKE IT A FELONY (WITHOUT ANY LOOP HOLES) TO:

A. ...Bring any battery minerals, or batteries, into the USA from any fields or mines not certified and inspected by the United Nations as "fair labor produced" and with certification proving that they do not use BLOOD MINERALS....

B. ...Own ANY energy or mining stocks if you work for, or consult to, the U.S. Department of Energy...

C. ...Operate any company financed by the Department of Energy which uses BLOOD MINERALS!

Department of Energy staff will not regulate these blood minerals slavery crimes because Department of Energy staff own these companies and are paid bribes in stock market perks, as quid pro quo.

This man gave a very good description about what's going on in RDC since 2000 for this type of mining of 3lg conflict minerals. Coltan and cobalt only started in 2012. The situation in shabara mining and others are terrible. Slavery, murders, pollution. Chinese Cie are there .

Replying to
[@backtolife_2023](#)

It would be interesting to look at the morals around lithium extraction too. Biggest mining operations are in Australia. Biggest known reserves are in Chile. Do those mining companies own the land they're extracting from? How did they acquire that land?

Renewable energy industry needs 1733 years of cobalt.

Metal	Element	Total metal required to produce one generation of technology units to phase out fossil fuels (tonnes)	Global Metal Production 2019 (tonnes)	Years to produce metal at 2019 rates of production (years)
Copper	Cu	4 375 513 624	24 300 000	180.1
Nickel	Ni	940 578 114	2 350 142	400.2
Lithium	Li	944 150 293	95 170*	9925.7
Cobalt	Co	218 296 990	136 619	1733.0
Graphite (Natural Flake)	C	8 973 640 257	1 156 300*	3287.9
Graphite (Synthetic)	C	-	1 571 000*	-
Silicon (Metallurgical)	Si	49 571 460	8 410 000	5.9
Vanadium	V	681 865 986	96 021*	7101.2
Rare Earth Metals				
Neodymium	Nd	965 183	23 900	40.4
Germanium	Ge	4 163 182	141	29113.0
Lanthanum	La	5 970 730	35 800	166.8
Praseodymium	Pr	235 387	7 500	31.4
Dysprosium	Dy	196 207	1 000	196.2
Tellurium	Te	167 211	280	598.9

* Estimated from mining production. All other values are refining production values.
 * Natural flake graphite and synthetic graphite have combined to estimate the total production

METAL PRODUCTION IN 2019

Electric Vehicle Charging Insanity

In order to match the 2,000 cars that a typical filling station can service in a busy 12 hours, an EV charging station would require 600, 50-watt chargers at an estimated cost of \$24 million and a supply of 30 megawatts of power from the grid. That is enough to power 20,000 homes. No one likely thinks about the fact that it can take 30 minutes to 8 hours to recharge a vehicle between empty or just topping off. What are the drivers doing during that time?

ICSC-Canada board member New Zealand-based consulting engineer Bryan Leyland describes why installing electric car charging stations in a city is impractical: "If you've got cars coming into a petrol station, they would stay for an average of five minutes. If you've got cars coming into an electric charging station, they would be at least 30 minutes, possibly an hour, but let's say its 30 minutes. So that's six times the surface area to park the cars while they're being charged. So, multiply every petrol station in a city by six. Where are you going to find the place to put them?"

Used Car Market

The average used EV will need a new battery before an owner can sell it, pricing them well above used internal combustion cars. The average age of an American car on the road is 12 years. A 12-year-old EV will be on its third battery. A Tesla battery typically costs \$10,000 so there will not be many 12-year-old EVs on the road. Good luck trying to sell your used green fairy tale electric cars.
