Beautiful liberal San Francisco.

There were discarded needles on 41 blocks and feces on 96. There's an interactive map to check which blocks yielded which types of waste, should anyone want to go down that rabbit hole.

UC Berkeley professor Lee Riley, who specializes in infectious diseases, told NBC Bay Area that the level of unsanitary conditions on the worst SF blocks is "much greater than communities in Brazil or Kenya or India."

But I have money for cigs.

\

\

Some do have a sense of humor.
