

Amazon Treasure Truck Bursts Into Flames Lithium Ion Batteries In Cargo Suspected Of Self Ignition

Filed Under: [amazon](#), [Local TV](#)

PHILADELPHIA (CBS) – An Amazon Treasure Truck was destroyed after it burst into flames overnight in West Philadelphia.

An Eyewitness News viewer sent video of the fire on 42nd and Samson Streets, around 1:30 a.m.

The truck was parked in a lot at the time of the fire.

The [Amazon Treasure Truck](#) is a promotional tool for the online company. The vehicle drives around different cities, offering big deals on certain items.

Officials say the cause is unknown, but the fire is not suspicious.

No one was injured.

A vast number of Fedex and UPS trucks have burst into flames over past years as lithium ion batteries appear more often in Amazon shipments.

Lithium ion batteries: Cause wars in the Congo, Afghanistan and Bolivia; are owned by ex-CIA bosses; mutate fetuses when they burn; destroy your brain, lungs and nervous system when they burn; kill the factory workers who make them; cause Panasonic to be one of the most corrupt companies in the world; poison the Earth when disposed of; can't be extinguished by

firemen; poison firemen; are based on criminally corrupt mining schemes like URANIUM ONE; Have over 61 toxic chemicals in them; come from an industry that spends billions on internet shills and trolls used to nay say all other forms of energy; are owned by corrupt U.S. Senators who are running a SAFETY COVER-UP about their dangers; Apple products with lithium ion batteries have been exploding and setting people on fire; over time the chemical dendrites inside each battery grow worse and increase the chances of explosion over time - LITHIUM ION BATTERIES BECOME MORE AND MORE LIKELY TO EXPLODE AS TIME GOES ON AND AS THEY AGE; "Bad Guys" have figured out to make them explode remotely; have their dangers hidden by CNN and MSM because pretty much only the DNC people profit from them; are the heart of Elon Musk's stock market scam; the Obama Administration promised Silicon Valley oligarchs the market monopoly on lithium ion batteries and the sabotage of fuel cells in exchange for campaign financing and search engine rigging; United States Senators that are supposed to protect us from these deadly products own the stock market assets of them so they protect them and stop the FDA, OSHA, DOT & NHTSA from outlawing them. WRITE YOUR ELECTED REPRESENTATIVE AND DEMAND THAT LITHIUM ION BATTERIES BE MADE ILLEGAL TO SELL! NICAD and Hundreds of other battery chemistries don't have all of these problems. A recent fire on U.S. Highway 101 near Mountain View, CA, involved a Tesla Model X that crashed into an unshielded highway median. Two other vehicles rear-ended the Tesla SUV, which caught fire. News reports said that the highway was closed for five hours as firefighters, wearing special hazmat suits, tried extinguishing the blaze that continued to burn the SUV despite their best efforts. Firefighters finally put in a call to Tesla asking for help in how to extinguish the blaze. Lithium ion EVs are more prone to battery fires. Experts say that their lithium-ion batteries can fuel hotter fires that release toxic fumes and are more difficult to put out. Also, another problem reported is that the fires keep reigniting which explains why it takes so long and requires copious amounts of water or foam (it is an electric fire, after all) to smother the flames.
