Fired FBI Director James Comey had Special Agents in Charge (SAC's) retaliate against field agents who spoke out against his mishandling of the Clinton email investigation.

In fact, some of the outspoken agents had Office of Professional Responsibility (OPR) investigations opened on them as punishment.

A few weeks ago, Sean Hannity told his audience 28 FBI agents have asked to testify against the corrupt Deep State.

Sean Hannity: We have an IG report coming out and I'm told as many as 28 people that have knowledge of the Clinton email server want to be subpoenaed so that they can tell the story of corruption at the highest levels of the bureau at that love.

John Giacalone, who preceded Steinbach as the bureau's top national security official and oversaw the first seven months of the Clinton probe testified a few weeks ago as witness.

The word is that Giacalone quit the FBI in protest over how the higher ups were killing the investigation.

Giacalone **resigned from the Hillary Clinton case** and retired from the FBI because he felt the case was going "sideways"; that's law enforcement jargon for "nowhere by design."

Crooked cop Comey drafted Hillary Clinton's exoneration letter before interviewing 17 witnesses, including Hillary Clinton; he also handed out immunity like candy.

Inspector General Michael Horowitz recently revealed in a Congressional hearing the FBI never named a target or even a subject in the Clinton email probe!

So neither Hillary or her aides were officially under FBI investigation at any time during 2015-2016. Sickening!

Now this...

Investigative reporter, Paul Sperry says Comey retaliated against field agents who spoke out against his mishandling of the Clinton email investigation!

Sperry tweeted: BREAKING: Comey had SACs retaliate against field agents who spoke out about his mishandling of the Clinton email investigation. Some critical agents had OPR investigations opened on them.

BREAKING: Comey had SACs retaliate against field agents who spoke out about his mishandling of the Clinton email

investigation. Some critical agents had OPR investigations opened on them.
