

THE PUBLIC TEAMS UP TO BANKRUPT THE CORRUPT COMPANY CALLED GOOGLE

Easy ways you can demonetize google (politics)

by [jackthebutholeripper](#)

- [Yalp Store](#)

Yalp Store is a google play store replacement that downloads the .apks directly to your phone and manages them using a built in account, meaning you dont need a google account to use it.

couple other features:

If root is available, Yalp Store can update your apps in background, install and uninstall system apps. Yalp Store can be installed as a system app to gain background package installation permission. In this case "Unknown sources" setting can be left off. You can let Yalp Store self-install as a system app, or get the OTA zip from the releases page.

The point of Yalp Store is to be small and independent from Google Services Framework. You might want to use Yalp Store is if you frequently flash experimental ROMs. This often breaks gapps and even prevents their reinstallation. In this situation Yalp will still work.

This app is dope as hell for anyone preferring more functionality and control as especially anyone who [prefers not to monetize google any longer](#) 

There is also, [The Galaxy App](#) is a Yalp fork that can be used alongside MicroG. This means you can still use

apps that would typically require access to google services while enjoying the perks of Yelp.

- HookTube

HookTube is a way to watch youtube movies off of Google's Framework. This means you can watch youtube vids without monetizing youtube (or google/alphabet etc.).

The best part is how easy it is to use. All you have to do is change the "you" in "youtube" to "hook" for any youtube link

Take the fantastic video u/nostrodanonymous linked in [this r/conspiracy post](#) syncing up the police body cam audio from the las vegas shooting with the police scanner audio.

just change the "you" in the "youtube"

link: [youtube.com/watch?v=DU7RpJH02nk](https://www.youtube.com/watch?v=DU7RpJH02nk) YouTube to

"hook:" [hooktube.com/watch?v=DU7RpJH02nk](https://www.hooktube.com/watch?v=DU7RpJH02nk) HookTube

and you're good to go baby!! I'd recommend doing this whenever posting links to youtube videos in order to maximize demonetization.

Plus, hooktube is way more convenient than youtube because they put all the available download links to the videos right there for you!

If you are worried about this method also demonetizing you're favorite youtubers, I would recommend visiting them on another platform they jumped to (which many popular youtubers have done now anyway) or contributing to them directly

- Alternative Search Engines

This one is simple. Don't search the web using Google!! There are countless alternatives: DuckDuckGo, Startpage, Yandex, searx.me, Yahoo, and Bing for

instance (duckduckgo being the most highly recommended of course!)

I've made [this poster](#)  that I hope some of you will share! maybe if someone can make a better looking one, the mods.might sticky it.

Let's hit em' where it hurts! Thanks for reading!

Here are two write ups I've done that might be helpful to you. I'm currently doing my monthly update of the second and I'll look at the first one later tonight.

hooktube doesnt keep its own copy of the video, so dont look at it as an archive of videos that would otherwise be censored by big alphabet

Don't use ddg, use searx.me

Duckduckgo passes info to the goog

[–] [Whitworth](#) 5 points (+5|-0) 6.2 hours ago

Do you have a link to verify that? I'm not calling bullshit, I'd just like to see where that's coming from.

[Permalink](#) [Parent](#)

NONE OF THAT DOES ANYTHING.

Google makes money with ads and with nothing else. Not search, not views, not apps. **Block all ads, everywhere, no exception.** Block all outgoing connections to any Google-owned website or service, everywhere.

[–] [powerpete](#) 11 points (+11|-0) 7.6 hours ago

If you wanna fuck with their ads, use the [AdNauseam](#) adblocker. Not only does it block ads, it clicks them in the background. After clicking them, it keeps track of the damage you've done. Since last week, I've done about \$3000 in click damage. <https://kek.gg/i/4zZ2KF.png>

They also make money by selling your information to other jews.

[Permalink](#) [Parent](#)

[–] [TheKobold](#) 5 points (+7|-2) 8.2 hours ago

Keep using google goyim we only make money off ads. Not off the user data we scrape and sell.

keep using

Did I say anything about that? Read it again.

This is where the Brave browser comes in handy. Automatically blocks ads and cookies hassle free, and looks very similar to Google Chrome.

There is alternatives to Android & IOS in the making. Mainlining Linux into phones is coming along nicely (using the proper Linux kernel instead of Android kernel). Examples are [Maemo Leste](#) and [PostmarketOS](#). They will be way more efficient/opensource/usable/private. There will also be leeway for running Android apps.

Next week OP tells us how to demonetize Microsoft and Yahoo. Doh!

Permalink

[–] [Dark_Shroud](#) 0 points (+0|-0) 1.5 hours ago

Yahoo already is demonetized. They're in the process of transferring ownership to Verizon and their search engine already is powered by Bing.

F-Droid is a great alternative Android market.

Permalink

[–] [jackthebutholeripper](#) [S] 0 points (+0|-0) 1.5 hours ago

f-droid is dank as fuck. there is so much tight shit on there (like yalp store)
